FOREWORD TO
VOLUMES IX AND X

This is a collection of miscellaneous material including articles and documents written by or about E. Raymond Wilson, chiefly in the period between 1961 and 1980. There are some items going back as early as 1918 that were not included in the previous volumes.

A variety of items gathered for inclusion in this volume were lost or misplaced and, so far, have not been found. A list is included in this book.

Volume X continues this series until early 1981.

I tell people that I have worked for world disarmament for fifty years, and so far we have about eleven treaties but a rapidly escalating arms race and no substantial disarmament yet--so this is no time to stop.

With appreciation to the Swarthmore College Peace Collection for providing space for the safe-keeping of these historical treasures,

E. Raymond Wilson
