 E-mail: provost@temple.edu

To: Instructors Who Taught Courses in Spring 2008

From: Lisa Staiano-Coico

Subject: Course and Teaching Evaluations

Date: June 6, 2008

Included in this report are the results from the student evaluations for your course in spring 2008. The results are based on those student evaluations that were returned to your college or departmental office by the student volunteer from your course. This message contains a summary of the rating data and a listing of all the comments made by the students in your course to the open-ended questions on the evaluation form. A brief explanation of how to interpret the data is presented below.

Data from a hypothetical course section for Question 1 within the “General Information About the Instructor” area:

		Strongly Agree = 5	Agree = 4	Neutral = 3	Disagree = 2	Strongly Disagree = 1	Not Applicable or Did Not Answer	Mean	SD	Pct'l Rank
ENROLLMENT:	14									
RETURNED FORMS:	12									
1. The instructor clearly explained the educational objectives of this course.	n = 12	(7)	(4)	(1)	(0)	(0)	(0)	4.50	0.65	
	Section	58%	33%	8%	0%	0%		4.50	0.65	
	Department	41%	43%	11%	4%	2%		4.17	0.89	74
	College	44%	42%	9%	3%	1%		4.25	0.85	68
	Level	46%	40%	9%	3%	2%		4.24	0.89	59
	University	45%	41%	9%	4%	2%		4.23	0.89	66

The data presented above indicate that there were 14 students enrolled in the course, but that only 12 returned the evaluation form. The first line in the table reports the number of students who used each of the possible ratings. Thus, of the 12 students who completed the

rating form, 7 indicated that they “Strongly Agree” with the statement that “The instructor clearly explained the educational objectives of this course”, four indicated that they “Agree” with this statement, one student reported “Neutral”, and no student indicated disagreement with the statement. In addition, no student checked “Not Applicable” or did not answer the question.

The second line of the table (labeled “Section”) presents these same data converted into percentages. Since 7 out of the 12 students used the rating of “Strongly Agree”, this is 58% of the ratings. The 4 students who indicated that they “Agree” with the statement represent 33% of the ratings, and so on. Using a value of 5 for “Strongly Agree,” 4 for “Agree,” 3 for “Neutral” and so on, the mean (or average) for this section is 4.50. The column labeled “SD” (for Standard Deviation) is an indication of the dispersion of the ratings. Since most of the students rated the course fairly highly, the dispersion of these ratings is relatively small.

The final four lines of the table report the data for different comparison groups. These groups are:

Third line (Department):	All of the courses in the same department as the hypothetical course
Fourth line (College):	All of the courses in the same college as the hypothetical course
Fifth line (Level):	All of the courses, across the University, at the same level (lower division undergraduate, upper division undergraduate, or graduate/professional) as the hypothetical course
Sixth line (University):	All of the courses across the entire University

The final number in the table at the end of lines three through six is a percentile rank that is provided as one way to compare an instructor’s ratings to these different groups. For example, on the bottom line, the table indicates that for Question 1, the average score for all University courses rated in the sample semester was 4.23. When the average Question 1 scores for all University courses are listed from top to bottom, the hypothetical course’s average of 4.50 is at the 66th percentile. That is, 66% of all the courses had average scores lower than the hypothetical’s on Question 1. These data are reported for all 15 questions on the evaluation form.

The additional data that are reported (page 1 of your report) were derived from the questions at the top of the student evaluation form. These questions ask the students to indicate what their interest was in the course prior to taking it, what grade they expect to get, whether the course was required or elected, and the number of hours per week spent preparing for the course. As before, comparison data are provided.

Please be advised that data are not reported for any course in which the enrollment is less than eight. This decision was made to ensure that anonymity is maintained for students whose identity might be determined in courses with limited enrollment.

If you have suggestions about the way the form is structured or about the way the data are reported, please send your suggestions to provost@temple.edu. Thank you for your participation.

Additional Items Report

Below is an analysis of responses in the "Additional Items" section of the student sheets.

This section was not scored because either additional (optional) items were not used or no additional items were answered.

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

Having time to receive help out of class.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

Nothing.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

He was a great instructor.

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

M.J. was always there to help.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

M.J. doesn't need to change a thing.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

M.J. did great!

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

How he was available after class
and went over homework.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

He was sensitive to diversity

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?
2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?
3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

He was fair to everyone

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?
2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?
3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

It was adequate

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

I liked how he explained everything and wrote notes on the board were extremely beneficial and helpful. Very upbeat and personable in class. Best math teacher I had.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

Nothing

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

Yes he was sensitive to diversity

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

his willingness to meet with you after class
and working through lots of example
problems throughout the class time
practice tests and review/homework problems

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

he taught well, I wouldn't change anything except
maybe grading how some get participation or extra pts.
for doing it

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

his very good and willing to help everyone

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

MJ was awesome. I hated Math before his class. I actually ~~understood~~ understood everything. This class is going to be my first B in Math, ever.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

Nothing. He was awesome & so helpful. I'm upset he is leaving Temple.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

Every ASPECT

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

None Everything was
FINE

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

He is A great teacher

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

Realistic examples of concepts and availability to answer questions

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

nothing

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

No problems

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

Dr Johnson is passionate about math & therefore should be teaching a higher level course. I feel however that his passion led him to make the course unnecessarily difficult. Additionally the MSRC Review tests did not match those given in class and those disparities led to problems. Excellent teacher nonetheless

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

I would not require any students to take such a math class as this is. Apart from the finance the methods taught are completely useless (see problem 17 from exam) to an artist. If I had my way my course of study would not be diluted by math and science as it has here at Temple.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

(The instructor was nice to everyone even artists.)

→ Cont'd

Requiring students to take 2 and 3 math courses is so obviously a ploy to get our money. You're not pulling the wool over my eyes.

~~May~~ May all Mathematicians Roast in Eternal Fire.

Part 6. Comments

Please comment on the quality of the course and instruction.

1. What aspects of the course or the instructor's approach contributed most to your learning?

Very Charismatic! Lots of fun.
