MISSION STATEMENT

UCT aspires to become a premier academic meeting point between South Africa, the rest of Africa and the world. Taking advantage of expanding global networks and our distinct vantage point in Africa, we are committed through innovative research and scholarship, to grapple with the key issues of our natural and social worlds. We aim to produce graduates whose qualifications are internationally recognised and locally applicable, underpinned by values of engaged citizenship and social justice. UCT will promote diversity and transformation within our institution and beyond, including growing the next generation of academics.

Foundation statement underpinning the mission statement

Our research-led identity is shaped by a commitment to:

- academic freedom as the prerequisite to fostering intellectual debate and free inquiry;
- ensuring that research informs all our activities including teaching, learning and service in the community;
- advancing and disseminating knowledge that addresses the key challenges facing society – South African, continental and global;
- protecting “curiosity driven” research;
- nurturing and valuing creativity in the sciences and arts including the performing and creative arts;
- stimulating international linkages of researchers and research groupings;

We strive to provide a superior, quality educational experience for undergraduate and postgraduate students through:

- providing an intellectually and socially stimulating environment;
- inspired and dedicated teaching and learning;
- exposure to the excitement of creating new knowledge;
- stimulating the love of life-long learning;
- the cultivation of competencies for global citizenship;
- supporting programmes that stimulate the social consciousness of students;
- offering access to courses outside the conventional curricula;
- attracting a culturally and internationally diverse community of scholars;
- guaranteeing internationally competitive qualifications;
- offering a rich array of social, cultural, sporting and leadership opportunities;
- providing an enabling physical and operational environment.

In advancing UCT as an Afropolitan university, we will

- expand our expertise on Africa and offer it to the world;
- extend our networks on the continent, along with our global connections and partnerships;
- promote student and staff exchanges and collaborative research and postgraduate programmes;
- engage critically with Africa’s intellectuals and world views in teaching and research;
- contribute to strengthening higher education on our continent.

We strive to provide an environment for our diverse student and staff community that:

- promotes a more equitable and non-racial society;
- supports redress in regard to past injustices;
- is affirming and inclusive of all staff and promotes diversity in demographics, skills and backgrounds;
- offers individual development opportunities to all staff;
- is welcoming as a meeting space for scholars from Africa and around the world.

The University has made every effort to ensure the accuracy of the information in its handbooks. However, we reserve the right at any time, if circumstances dictate (for example, if there are not sufficient students registered), to
(i) make alterations or changes to any of the published details of the opportunities on offer; or
(ii) add to or withdraw any of the opportunities on offer.
Our students are given every assurance that changes to opportunities will only be made under compelling circumstances and students will be fully informed as soon as possible.
Teaching and Learning Charter

Mutual Commitment
Benefiting from the opportunities of education requires a mutual commitment on the part of both student and teacher.

Students should understand that, by accepting the offer of a place at the University, they undertake responsibility for their own learning. This requires that they attend classes, tutorials, practicals and other scheduled activities and prepare assignments to the best of their ability, handing in work on time. Students should be considerate to the needs of others in their behaviour in lectures and tutorials. They should act with honesty and integrity, ensuring that work that they hand in is their own, that all the sources that they use are properly acknowledged, and that they respect and follow the rules and procedures for formal examinations.

Good teachers bring enthusiasm, originality and flair to their work. Good teaching is best fostered in a collegial atmosphere where codes of practice provide a baseline standard for professionalism, rather than serving as a prescriptive and prescriptive list of requirements. While Heads of academic departments are formally responsible to Senate for teaching and learning in their departments, individual members of the academic staff are accountable for their contribution to the university’s educational mission. Teachers should understand that, by accepting employment on the academic staff of the University, they undertake to provide all reasonable assistance to students to enable them to succeed in their studies. This requires that they deliver lectures and other scheduled classes and make every reasonable effort to make alternative arrangements if they are unable to do so. Teachers should be available for student consultations at reasonable and clearly-advertised times, and should hand back student work timeously, and with appropriate comment. Teachers’ expectations of students should be clearly set out in course outlines, available before the course starts. Required reading and other preparation should be clearly specified, and teachers should ensure that such materials are available to students in the Library, in textbooks that are available, and in authorized course readers. Methods of evaluation and assessment that will be used in the course must be defined and described in the course outline and followed in the course. Expectations of students in formal examinations must be set out, and such formal examinations must have a fair and reasonable relationship with the ground covered in the course. Consequently: Students should make a formal undertaking, as part of the process of admission to the University, to take responsibility for their own learning, to respect the requirements of the courses for which they register, and to take part in the academic life of the University with integrity and honesty.

Academic staff undertake to

1. provide clearly written course outlines, setting out what is expected of students for the complete course, that are available well in advance of the beginning of the course, to allow students adequate time to prepare;
2. provide clearly written course outlines, setting out what is expected of students for the complete course, that are available well in advance of the beginning of the course, to allow students adequate time to prepare;
3. provide lists of required and recommended reading for courses, in advance of the beginning of the course, and to establish that this material is in the University Library, in local bookshops (by timeous submission of reading lists), or in course readers (with copyright clearance, and within agreed policy for course levies);
4. set out a clear and well-designed system of assessment for the course, which defines what is expected of a student, and the relative value of different coursework, test and examination components; set clear and consistent DP requirements for courses, consistently enforced;
5. present lectures and tutorials in a clear manner, explaining technical terms where appropriate;
6. establish a fair and consistent approach to hearing requests for concessions and re-marking of assignments, and for leave of absence from lectures (where attendance is compulsory),
tutorials and other class sessions;
7. adhere to an agreed and published timetable for lectures, tutorials and other teaching sessions, that respects the need of students to plan their class attendance and study time;
8. ensure that they, and other teaching staff involved in their courses, are available to meet with students at advertised office hours, and interact with students without discrimination or favouritism;
9. return work submitted for assessment within a reasonable period of time, with adequate and appropriate comments and other forms of evaluation, and ahead of formal examinations, so that students can incorporate feedback in their examination preparation;
10. ensure consistent marking of examination papers and, for large classes, effective moderation of examination marking by the lecturer concerned;
11. organize a written evaluation for each course, allowing students to express their views freely and, if they wish, anonymously, and build on the outcomes of such evaluations in adapting the course for the future.

Postgraduate students have particular needs, and the relationship between postgraduate students and their supervisors is set out in a parallel policy*, which should be read in conjunction with this Teaching and Learning Charter.

* The specific requirements and responsibilities of Master’s/PhD students, and their supervisors, are detailed in the Memorandum of Understanding entered into between students and their supervisors, and updated with an annual supplement in all subsequent years prior to the renewal of the candidate's registration.

Professional registration

Psychology
To become a Psychologist in one of the recognised areas of Psychology, namely Clinical, Counselling, Educational, Organisational and Research Psychology, a student must complete a recognised Master’s degree in Psychology and an appropriate practicum at a recognised training institution. The duration of a practicum is 12 months. Persons registered from 1 January 2005 in addition will have to write an examination set by the Professional Board for Psychology.

The Department of Psychology at the University of Cape Town provides training leading towards registration in Clinical Psychology. The School of Management Studies in the Faculty of Commerce provides training leading towards registration in the fields of Organisational Psychology.

Social Work
Practice in the field of Social Work is regulated by the Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training in terms of these standards.

Under current legislation, the minimum requirement for professional registration with the Council is a 4-year BSocSc(SW) degree. Students registered for the BSocSc(SW) degree are required to register as student social workers from the 2nd year of study.

The South African Council for Social Service Professions will accept the UCT 3-year BSocSc(SW) degree plus an Honours degree offered by the Department of Social Development as equivalent to the BSocSc(SW) 4-year degree for registration as a Social Worker.

NOTE: Those students who registered prior to 1988 and completed the BSocSc (B curriculum) degree must be in possession of the BSocSc(SW) Honours degree or the Advanced Diploma in Social Work to qualify for professional registration with the Council for Social Service Professions.

**List of Departmental Abbreviations**

In numerous instances courses are referred to through use of their new codes, and it is likely that, over a period of time, the course codes will replace long descriptive course names. To assist students in adapting to the new codes, a list of departmental abbreviations is given below. This is not a comprehensive list, but includes those teaching courses most frequently taken by students in this Faculty. In cases where a new code is not understood, the department should be identified from the list, and then the departmental entry in this Handbook, or the Department itself, should be consulted.

Structure of Course Codes

Every course in this Handbook has a course name and a course code (or catalogue number). With the introduction of the PeopleSoft Student Administration system, the structure of course codes has changed from seven characters to eight characters, e.g. ELL461F has become ELL4061F.

The code structure is uniform and it gives important information about the course. Each code has eight characters, as follows: AAA1nnnS, where

AAA is a 3 alpha-character group identifying the department
1 is a number representing the year of study in which the course is usually taken
nnn is a 3 character number that identifies the course uniquely
S is a single alpha-character suffix, giving information about the course

Suffixes which are most frequently used in the Faculty are:
F First semester course
S Second semester course
W Whole-year course
H Half-course taught throughout the year
Z Non-standard period

The following examples show how the codes work:

ELL4061F Literature and Language Studies
ELL designates an English course
4 designates an Hons course
013 serves to distinguish this course from other first year English courses
F designates a first semester course

POL5002S Conflict in World Politics
POL designates a Political Studies course
5 designates a Master’s course
035 serves to distinguish this course from other second year Political Studies courses
S designates a second semester course

EDN6015F/S Advanced Educational Research Design
This designates that the course is offered in the first semester and again in the second semester.

Honours and Master’s Programmes in Heritage and Public Culture

Convener:  Associate Professor N Shepherd

The language of heritage has become ubiquitous in post-apartheid South Africa. From former president Mbeki’s speeches, peppered with references to a deep history of indigenous achievement at sites like Mapungubwe and Timbuktu, to struggles around cultural rights and the role of
traditional leaders, to debates around language and the role of local and indigenous knowledges, speaking of heritage has become a way of addressing complex issues of culture, identity and citizenship. At the same time, the South African experience post-1994 with questions of public history, memory and heritage is widely understood to have been paradigmatic. The postgraduate programme in Heritage Studies in Africa in the Centre for African Studies engages with the richness of local heritage sites, archives and institutions and the central role that formulations heritage have come to play in emergent notions of culture and identity. It differs from other heritage programmes, locally and internationally, in a number of respects. First, in being critical and interdisciplinary in nature, and in drawing on expertise across a range of subject areas. Second, in taking seriously questions of performance, orality and the intangible and embodied aspects of heritage, as a way of moving beyond a tradition of heritage studies focused on sites and buildings. And third, in contextualising questions of heritage in relation to questions of knowledges, archives and the formation of the disciplines in Africa. Students may choose to specialise in any one of the following three areas:

- Public Histories
- Performance
- Archives and Knowledges

In addition, students will do a compulsory methods elective and may choose to do a guided internship in a heritage institution. The programme offers training and a practical orientation for work as heritage professionals in a variety of arenas and institutions, as well as for further research. Students with good first degrees with a broadly appropriate range of subjects are invited to apply.

Programme structure:
Students are required to do compulsory courses in the African Studies and in the School of Architecture and Planning (in Master’s year). In addition, they can choose elective courses from a range of departments and disciplines. All students are encouraged to craft a specialisation particular to their own research interests and future world of work.

The Centre was constituted in 1976 and built on the work of the School of African Studies which had been in existence for over fifty years and was one of the oldest in the world. Current scholarship takes place within the context of the mission of CAS, which promote scholarship in the various fields concerned with people in Africa. The brief remains focused on providing a critical comparative perspective between Southern Africa, Africa, and the globalizing world. The mission remains urgent, given the longstanding and continuing dominance of Western models and discourses. The Centre houses research projects, organizes a range of seminars, conferences, and talks, and runs a gallery open to a wide variety of cultural performances.

Research Chairs

Professor C Hamilton - Archive and Public Culture:
Professor Hamilton was recruited to this position in view of the strategic significance of the country's archival estate for the national priority of developing social cohesion. The appointment was made in view of UCT's already significant investments and achievements, across a number of disciplines, in critical archival engagements, archive curation projects and collaborations with public culture institutions, including collaborations in heritage training carried out in partnership with the University of the Western Cape.

Professor R Mesthrie - Migration, Language and Social Change:
Professor Mesthrie was appointed to this position in view of the significance of Sociolinguistics in understanding heritage, culture and social change in a multilingual society. The chief focus of the research chair will be on migration, language and social change, examining sociolinguistic practices “from below” in relation to the fostering of multilingualism, the further intellectualisation of local languages and the continuing prestige of English. Professor Mesthrie will continue as President of the Linguistics Society of Southern Africa.

The dissertation (practical thesis and written explication) shall be passed with distinction if it receives a mark of 75%.

### Research Master’s in Drama (180 HEQF credits)

**Admission requirements:**

Faculty Rule FM3 and University General Rules apply.

Applicants must have the required academic background and submit an acceptable research proposal for which supervision is available.

Master’s in Applied Economics: Applications in Development (240 HEQF credits)

Programme convener: Associate Professor M Wittenberg.

The School of Economics offers a Master’s in Applied Economics: Applications in Development in recognition of the need for a flexible programme structure which allows students to focus on research while choosing a curriculum best suited to their abilities and interests. The aim is to equip students with essential research skills (both quantitative and writing skills) and knowledge in their chosen area of specialisation. The 120 credit dissertation weighting allows students to qualify for NRF funding.

This stream is designed for candidates who seek to work as applied practitioners and policy makers in government and government agencies, in the private sector and in non-governmental organizations. The stream prepares graduates to utilize their economics training in the application to a wide range of development problems.

Entrance requirements:
- An average of at least 65% in an Honours degree in Economics.
- Before admission to the programme a candidate shall have completed quantitative courses in Econometrics at Honours level, or the equivalent. A candidate who has not completed these courses, or their equivalent, shall be required to complete these as preliminary work whilst registered as a candidate for the degree in addition to the prescribed courses.
- Applicants may be required to undertake a Graduate Record Examination (GRE) test.
- Recommendation of acceptance is at the discretion of the Graduate Committee of the School of Economics.
In addition to completing the university application form, students applying from outside of UCT must also submit the course outlines of their highest level Economics courses as well as the names and contact details of two referees to the Graduate Administrator, School of Economics.

Programme structure:
This programme comprises two compulsory courses, two optional courses and a minor dissertation. Students taking ECO5046F or ECO5021F or ECO5020F are required to take ECO5011F Quantitative Methods for Economists prior to registering for these courses.

A candidate will ordinarily complete the prescribed courses in the first year, and will be expected to complete the dissertation within the following year.

The programme commences in January.

**The two-year programme:**

*Year 1* aims to enable students to grasp the discourses and practices that have shaped processes of adult learning, which in turn have structured the broad field of adult education. It will provide students with theoretical frameworks with which to view adult education practices to enable them to describe, analyse, assess and redesign these practices (where appropriate). A further aim is to enable students to increase their specialised roles in education, training and development, through building a broader repertoire of professional skills for work in the changing context provided by new policy frameworks.
Year 2 starts with a focus on theories which attempt to explain shifts in the organisation of learning and society, followed by contextual study in a site of practice with some degree of specialisation according to choice. The second semester provides a focus on research, with an introduction to evaluative research, followed by project-based research work which returns to aspects of professional practice.

- provide current principals with a formal professional qualification which is career related and,
- provide an entry criterion to principalship.

The programme further aims to achieve the following:
- provide leadership and management to enable the school to give every learner quality education through professional leadership and management of the curriculum and resources,
- strengthen and support the role of principalship and develop principals who are able to critically engage and be self-reflective practitioners, and
- enable principals to manage their schools as learning organisations and to instil values supporting transformation in the South African context.

Criteria for admission are as follows:

(a) Priority is given to practicing principals identified by provincial departments of education or other agreed methods.

(d) Be employed at Post Level 2 and upwards.
(e) Female educators will be given preference to address the gender equity profile in school management in the education system.
(f) Post Level 1 educators performing management tasks at P1 and P2 schools, will be considered. Their applications should be supported by a written statement, endorsed by the principal, school governing body or district official.
(g) The principal and/or school governing body should endorse all applications. Where this may not be possible candidates have the right to appeal to the appropriate/relevant accounting officer in the system.

Minimum admission requirements for Politics as home department:
- For Honours: 65% average for the Politics major, with preferably one or more senior Politics courses 70% or above.

General rules and requirements:
The following rules and requirements apply to all programmes offered by the Department:

Admission requirements:
General:
Admission to the Department's programmes is selective and can be highly competitive. The Department admits only those candidates that it judges are likely to complete the degree programme successfully.
Criteria taken into consideration for admission include:
  academic excellence, indicated by good performance in previous studies;
  academic potential, indicated by improving performance into and across the final year of previous study; and
  political, policy or work experience where it is relevant to the programme for which a candidate seeks admission.
Students who do not achieve a 65% average in the third year of undergraduate studies at UCT are unlikely to receive UCT postgraduate funding and are also unlikely to be selected for our programmes.

Admission to Honours degrees:
For admission at Honours level, students must have a BSocSc or a BA degree (or equivalent qualification). External candidates and UCT students must apply formally via Admissions. In addition, the Department requires that a questionnaire be completed. This can be accessed on the Political Studies website. UCT students interested in the Honours programmes are encouraged to apply by the close of the 3rd quarter of the academic year. Cases will be decided by, among others, admitting students on a conditional basis; for example, ‘admitted subject to achieving satisfactory results in the 2nd semester’.

Admission to Master’s degrees:
For admission at Master’s level students must have a BA(Hons) or BSocSc(Hons) degree or equivalent qualification. External candidates and UCT Honours students must apply formally via Admissions. In addition, the Department requires that a questionnaire be completed. This can be accessed on the Political Studies website. External candidates who have a four-year degree may, in certain instances, qualify for admission to Master’s. For UCT students, the Postgraduate Committee decides when the results of the Honours Independent Projects have become available.

Honours and Master’s Programmes - structure:
All programmes comprise four taught courses at Honours level and four taught courses at Master’s level. Programmes at both levels also include a research component. Courses are designated as Core Courses, Core Electives and Elective Options. Please consult the course outlines at the back of this Handbook, or other relevant Faculty handbooks, for descriptions of these courses.

Notes on courses:
1. Honours students may take a maximum of two 5000-level courses and Master’s students may take a maximum of two 4000-level courses.
2. Some courses are offered every year and others are offered on a 2-year cycle or intermittently. Consult the website for information on the course cycle.
3. All courses are offered conditional on a minimum number of students registering for the course.
4. All electives are listed subject to them being offered by their respective departments. Please check the listings at the back of this handbook or other relevant faculty handbooks to confirm their availability.
Honours and Master’s Programmes in International Relations

Convener: Dr J Akokpari

Programme objectives:
International Relations at the University of Cape Town tries to strike a balance between International Relations as a field of study that evolved over centuries and International Relations as it is currently studied. International Relations as traditionally studied usually meant a focus on three concerns: war, diplomacy and trade. Now described respectively as conflict or security, diplomacy and negotiation and the international political economy, these remain the central subjects we want to study. Our approach also values, however, the contributions of other sub-fields of Political Studies, especially Comparative Politics, and contributions from other disciplines. In International Relations scholarly debates, African cases and issues are crucial and, for this reason, graduates of our programme are often called upon to show their expertise in African and/or Southern African material.

Admission requirements:
Specific additional entry requirements for this programme are a past academic history in Political Studies/Science or a strong academic background in a related discipline.

Honours (126 HEQF credits)

Programme structure:
Honours students are required to complete four taught courses as well as a Research Essay:

Honours and Master’s Programmes in Justice and Transformation

This programme is offered in collaboration with departments in the Humanities Faculty, the UCT Law Faculty, the Centre for the Study of Violence and Reconciliation (CSVR), the Institute for Justice and Reconciliation (IJR) and the International Centre for Transitional Justice (ICTJ).

Convener: Emeritus Professor A du Toit

Programme objectives:
The programme has been designed to locate current concerns and topical interests in justice and transformation in the more general perspectives of normative theory and comparative studies. It is inspired by the new directions in writing, research and teaching generated by the South African TRC-process but not confined to these. Instead, it links these new research interests and current debates in the area of transitional justice (including human rights law, conflict-resolution and peace-building, and social justice in transformation) with the more lasting intellectual perspectives provided by a thorough grounding in relevant academic disciplines.

Admission requirements:
At Honours level: a first degree majoring with an upper 2nd or close approximation. At Master’s level: a good Honours degree or its equivalent. Each of the sub-programmes has its own disciplinary-based entrance qualifications (see below).

Programme structure:
The full MPhil-programme comprises 4 semester courses in each of the Honours and Master’s years plus a dissertation component allowing exit options after the first year with an Honours degree and entry options at Master’s level. The programme is structured around a common and compulsory programme core course and a general programme in Transitional Justice OR a choice of concentrations in three different areas of specialisation:

(1) Programme core course(s)
(2) General programme in Transitional Justice with core electives in, e.g. Comparative Transitional Justice, Theories of Rights and Justice plus an elective option from a list of approved courses relevant to the Justice and Transformation programme, OR
(3) Concentrations in the following sub-programmes or specialisations:
   - Human Rights
   - Conflict Resolution
   - Social Justice in Transformation

The sub-programmes share the compulsory programme core courses and each specialisation has its own core electives with the remaining credits coming from a list of approved courses relevant to the Justice and Transformation programme. Some of the sub-programmes provide for Internships which may be substituted for one or more courses components (but not for the core courses).
The general programme in Transitional Justice and the different sub-programmes further require an Independent Research Project at Honours level leading to a Master’s Minor Dissertation.

- POL5035S Data Analysis in Political Sciences
- AXL4401F Ethnographic Research Methods
- SOC5030F In-depth Interviewing and Analysis

See details for this interdisciplinary programme in the Philosophy section of this handbook.

Honours and Master’s Programmes in Public Policy and Administration

Convener: Professor R Cameron

The Honours and Master’s Programmes in Public Policy and Administration (PPA) has two main objectives:

- Firstly, the programme is designed to engender in its students the capacity to think objectively and analytically about the policy process;
- Secondly, it aims to provide students with a theoretical and empirical understanding of comparative and South African public administration.

Furthermore, the programme aims to help students become more effective as policy makers, public servants, researchers or policy analysts. We are also interested in developing the next generation of public policy and administration scholars.

Students studying for Honours and MPhil over two years will explore, *inter alia*, the academic analysis of public policy, the role and limitations of professional policy analysis, changes in the character of public management and administration, and comparative public administration. In addition, students acquire skills in research methods, and develop knowledge of a specific aspect of policy making or public administration in contemporary South Africa in a chosen 'field of concentration’. After completing an Honours project that surveys academic literature and policy experience in an area, students will have the opportunity to work on a minor dissertation in their designated field. The programme is also open at Master’s level to students with appropriate academic backgrounds.

Admission requirements:
For admission at Honours level, students must have successfully completed a Bachelor’s degree. For admission to the MPhil programme, students must have successfully completed an Honours degree. Students should have a background in economics, public administration, politics, African Studies, law, gender studies, philosophy, the social sciences or related disciplines.

Please note that admission to our programme is highly competitive and not all applicants will be accepted.

**Mission Statement**

The Department of Religious Studies is committed to research and teaching which will contribute to public life in our local, regional, national and continental contexts. It is dedicated to:

- an open, plural, intercultural, and interdisciplinary study of religion in all its forms;
- the in-depth study of African religious traditions;
- the creative and critical analysis of religion as a force in personal, social, economic and political life;
- the promotion of quality education and research in the study of religion as a vital contribution to the transformation and development of South Africa.

The mission statement is implemented through degree programmes that focus on the broad theme of religion, culture and identity. The Department offers a systematic study of religion in public life, its meaning and significance in South Africa in particular and Africa in general. The broad theme reflects the various research projects of the faculty members and institutes presently housed in the
Department. In the first instance, the theme is explored in core courses team-taught by faculty members. These core courses provide the thematic, methodological and theoretical foundations for all students who choose to pursue degrees in the Department of Religious Studies. Additional courses continue this focus within the established areas of specialisation: African Studies, Christian Studies, Comparative Studies, and Islamic Studies.

Courses in areas of specialisation

Hereunder follows a broad map of the courses offered in the areas of specialisation. Not all courses indicated below will be offered in any given year. However, they will follow the pattern outlined here.

**African Studies**
The courses in African Studies are divided into three categories - systematic studies; historical and phenomenological studies; and cultural, social and political studies. Students taking African Studies as an area of specialisation will be expected to choose courses in these categories. Some of the courses envisaged are: African Religious Thought; African Religious Heritage; Knowing and Healing; African Religion and Human Rights; African Religion and Health; African Religion, Art and Spirituality.

**Christian Studies**
The courses in Christian Studies are divided into three categories: (1) Exploring the Christian tradition; (2) Christianity and contemporary issues; (3) Christianity in Africa.

**Comparative Studies**
The courses in Comparative Studies are divided into two categories: Issues in the Study of Religion and Religion in Contemporary Society. The first area includes courses in the Problem of Religion, Religion and Ritual, Sacred Space, Religion, Gender and Embodiment, and the History of Religions in Southern Africa. The second area includes courses in Religion and Popular Culture, Religion and Urban Culture and Religion, Education and Society in South Africa.

**Islamic Studies**
The courses in Islamic Studies are divided into classical Islamic thought and modern issues in culture and identity. Particular courses envisaged are: Studies in the Qur'an, Islamic spirituality, Islam and gender, Muslim Societies and Islam in Africa. Special foundation courses at the honours level prepare students for post-graduate research in Islamic studies.

**Colloquia**
In addition to the normal course requirements, students are required to attend the postgraduate colloquia held during the course of the year. The intention of the colloquia is to expose all postgraduates to seminars delivered by staff members and visitors to the Department. Attendance at all colloquia is compulsory and students will be required to reflect a knowledge of their content in examinations. Details of these events will be advertised during the course of the year.

Their work includes:

- Interdisciplinary research on religion and public health
- Identification and mapping of religious health assets
- Networking between religious and public health organizations and individuals in Africa and beyond
- Development of research materials and tools, and dissemination of such
- Research and evaluation of key public health projects and initiatives, with a special focus on HIV/AIDS
- Development of emerging health/development workers and academics in Africa

Thus ARHAP is a vast network of people working in the aforementioned fields with a hub in the Religious Studies Department at UCT.

ARHAP has published a literature review, a bibliography as well as numerous different research reports. For a complete list see http://www.arhap.uct.ac.za/publications.php.
Centre for Contemporary Islam (CCI)

The CCI is located in the Department of Religious Studies, Leslie Social Science Building, Upper Campus.
Contact email: Nabowayah.Kafaar@uct.ac.za; Website: www.cci.uct.za

Director:
Professor M Fareed (Expert in Islamic Law, Cape Town)

The CCI was founded in 1995 to bring attention to the scholarly study of Islam and Muslim societies and communities. It engages in a number of research projects, often in collaboration with other African and international scholars. Currently, the projects are: Islam and Public Life in Africa; South African Muslim Women: Sexuality, Marriage and Reproductive Choices; and Biographies of Religious Engagement. The first and third are led by Professor Abdulkader Tayob, and the second by Dr Sa’diyya Shaikh. The projects are directed to a sustained study of Islam, values and historical change.

Through its projects, the CCI provides a place for researchers to share ideas and develop insights on Islam and Muslim societies. It creates a space where students are inspired and supported to embark upon a systematic study and reflection on issues of great interest to scholars and the general public. Scholarships at graduate level are available on a regular basis.

The CCI has both regular and occasional publications. The Journal for Islamic Studies is an annual peer-reviewed publication accredited by the Department of Education (South Africa), and Annual Review of Islam in Africa provides a forum for young and established researchers to publish their findings in an accessible format.

The Centre for Curating the Archive, which includes the Lucy Lloyd Archive and Research Centre (LLAREC) and Katrine Harries Print Cabinet, has been established as a vehicle for the conservation and creative use of both object, image and paper collections. It builds on UCT's dual institutional strength in its numerous and valuable research collections on which much critical research is based, and in its established, and in many areas, cutting-edge, expertise in the area of presenting those collections. The linked research, often revealed in the public domain, uses these collections to facilitate and enrich public engagement around key questions of our times. It also aims to open up novel combinations of the historically separated domains of the creative arts, and the truth-claiming discourses of history and the social and natural sciences. In coupling the avowedly creative activity of curation with the seemingly objective site of archive the CCA signals its intention to draw attention to past and present processes of the making of archives of all kinds and the creation of meanings that flowed, and yet flow, therefrom.
The CCA is currently engaged with the VC strategic awarded Archive and Curatorship initiative (ARC: The Visual University and its Columbarium), headed by Professors Carolyn Hamilton (NRF Chair in Archive and Public Culture) and Pippa Skotnes (director of the CCA).

The Centre for Popular Memory, based within the Department of Historical Studies, is an academic centre involved with teaching, research and tasked with the archiving and preservation of audio and related research material, with special concentration on the oral historical materials produced by UCT staff and students.

The CPM prioritises questions around ‘the politics of memory and voice’ and explores this with clear academic foci and a public intellectual/advocacy role. Significantly the CPM manages a growing multi-lingual scholarly archive that contains over 3,000 hours of audio and video, predominantly of one on one oral history interviews. Our research prioritizes multi-lingual and interdisciplinary approaches to memory, narrative, culture, gender, identity formation, and the impact of violence and post-traumatic legacies in Africa. We specialize in multi levelled research outputs through academic journals, publications, exhibitions, film and web, including the development of scholarly content for portable media platforms.

**Institute for the Humanities in Africa (HUMA)**

Located in the Faculties of Humanities and Law, HUMA takes a broad view of the humanities, encompassing the social sciences and law.

**Director:**
Professor D Posel

**Staff:**
Associate Professor N Distiller (English Language and Literature Department)
Associate Professor S Jeppie (Historical Studies Department)
Dr J Steinberg

The humanities have long been vital to the creative and critical energies of societies in the throes of profound change. HUMA – the Institute for the Humanities in Africa – is a new initiative at UCT, intended to create a space of dynamic interdisciplinary community for scholars and students in the humanities at large. Fostering top-end academic research, HUMA seeks also to draw on that work to nurture critical public debate, promoting UCT’s vision of itself as a civic university contributing to the making of democratic citizenship.

HUMA’s intellectual agenda is driven by two inclusive research themes ‘on being human’, and ‘circuits of consumption’, which inform and structure three primary objectives:

- to conduct and promote research that is historically grounded and theoretically engaged, with an eye to the ‘big’ theoretical and ethical questions that anchor South African issues in wider fields of experience and analysis. The combination of intellectual focus and breadth provided by HUMA’s research themes is intended to open up spaces for dialogue, collaboration and argument across disparate theoretical, epistemological and methodological traditions, and in ways that help examine the project of interdisciplinary work.

- to nurture the expertise and enthusiasm of graduate students interested in an academic career, through a combination of intensive and supportive doctoral supervision, and a broader programme of seminars, symposia and workshops that help develop the intellectual versatility and confidence which an academic career requires.

- to bring scholars and graduate students into conversation with interested publics, around issues of shared and topical concern. HUMA hopes to promote what public intellectuals in the humanities do best, which is to de-familiarise and unsettle established ways of seeing, think creatively about pressing social and political questions, and keep the imagination of alternative futures alive.

This mission is embedded in a particular understanding of our location in Africa. Africa is a landmass with a deep and complex history of connection and disconnection amongst its many inhabitants; being African means being party to formative relationships of connection and disconnection that shape the ways we think and act. Our scholarship and debate, then, will be positioned in Africa, even if the focus of our deliberations is not limited to the continent.

**Isaac and Jessie Kaplan Centre for Jewish Studies and Research**
The Kaplan Centre was established in 1980 under the terms of a gift to the University of Cape Town by the Kaplan Kushlick Foundation and is named in honour of the parents of Mendel and Robert Kaplan. The Centre, the only one of its kind in South Africa, seeks to stimulate and promote the whole field of Jewish studies and research at the University with a special focus on the South African Jewish community. The Centre is multidisciplinary in scope and encourages the participation of scholars in a range of fields including history, political science, education, sociology, comparative literature and the broad spectrum of Hebrew and Judaic studies.

The Centre is engaged in both research and teaching and functions as a coordinating unit in the university. Its resources are used to invite distinguished scholars to teach Jewish-content courses within established University departments, to initiate and sponsor research projects, and to strengthen the university’s library holding of books, microfilms and archival sources. These research materials are made available to members of the University and to accredited visitors from the wider academic community.

The Centre awards a limited number of undergraduate and graduate scholarships as well as a limited number of research grants.

The Centre has a publications programme which brings out monographs and occasional papers. Lectures symposia and conferences are arranged under the auspices of the Centre. In some cases these are organised with the University’s Centre for Extra-Mural Studies, thereby serving the wider community.

Research Chairs Initiative (SARChI)

The launch of the South African Research Chairs Initiative (SARChI) is a significant injection into national research funding and aims to establish 55 new Chairs nationally in the first round, with the ultimate goal of 210 Chairs by 2010. SARChI is a brain-gain and research capacity-development intervention by the Department of Science and Technology (DST) that is being administered by the National Research Foundation (NRF). The alignment of UCT’s research strategy with national research and development priorities ensured that UCT secured a successful outcome in the first round of competitive applications.

UCT Chairs
A first set of 21 Chairs was awarded nationally in 2006, seven of which are at UCT. During the second round which was announced in September 2007, UCT secured 18 of the 51 Chairs awarded nationally. Four of these Chairs are in the Faculty of Humanities.

Professor C Hamilton - Archive and Public Culture:
Professor Hamilton was recruited to this position in view of the strategic significance of the country's archival estate for the national priority of developing social cohesion. The appointment was made in view of UCT’s already significant investments and achievements, across a number of disciplines, in critical archival engagements, archive curation projects and collaborations with public culture institutions, including collaborations in heritage training carried out in partnership with the University of the Western Cape.

Contact details: Carolyn.Hamilton@uct.ac.za or 021 650 4506.

Professor R Mesthrie - Migration, Language and Social Change:
Professor Mesthrie was appointed to this position in view of the significance of Sociolinguistics in understanding heritage, culture and social change in a multilingual society. The chief focus of the research chair will be on migration, language and social change, examining sociolinguistic practices “from below” in relation to the fostering of multilingualism, the further intellectualisation of local languages and the continuing prestige of English. Professor Mesthrie will continue as President of the Linguistics Society of Southern Africa.

Contact details: rajend.mesthrie@uct.ac.za or 021 650 5236.

Professor L Ntsebeza - Land Reform and Democracy in South Africa: State and Civil Society Dynamics:
Professor Ntsebeza is a UCT Principal Researcher in a major joint research project involving UCT and the Human Sciences Research Council. This project focuses on the Land Reform programme in South Africa with specific reference to the land rights of rural women. He continues to lead this project and uses it as a base to develop and highlight the importance of conducting research on the land question, a topic that is often marginalised in South Africa.

Contact details: lungisile.ntsebeza@uct.ac.za or 021 650 3503.

Professor A Tayob - Islam, African Publics and Religious Values:
Professor Tayob was appointed to this position to strengthen the Faculty of Humanities’ research base and output, with particular emphasis on the study of Islam in Africa. Professor Tayob will draw on his considerable international experience, most recently as named Chair at the Dutch-based International Institute for the Study of Islam in the Modern World from 2002 to 2006, to develop a community of researchers in this field. The research will enhance South Africa's capacity in international relations with regard to national, regional and global Islamic developments.

AXL4102W  GENDER ANALYSIS AND RESEARCH DESIGN  
HEQF credits: 24 at level 8.

Course convener: Associate Professor J Bennett.

Entrance requirements: Acceptance for an Honours or Master’s programme.

Course outline: This module will introduce key principles of gender analysis, as theorised by Western and by African-based feminist researchers. Participants will explore the value of gender analysis in the design of both quantitative and qualitative methods of research, paying particular attention to issues of research design. The module will also draw on case studies of research located in the disciplines of political science, cultural studies, criminology and history in order to explore the implications of drawing on gender as a tool of social analysis within research projects grounded within disciplinary frameworks.

AXL4104F  GENDER, PEACE AND JUSTICE  
HEQF credits: 24 at level 8.

Course convener: Dr H Scanlon.

Entrance requirements: Acceptance for an Honours programme.

Course outline: The development of peace-building initiatives in Africa has been mirrored by the expansion of various models of transitional justice. These encompass a range of judicial and non-judicial approaches adopted by post-conflict societies to address human rights abuses of the past such as war crimes tribunals and truth and reconciliation commissions. Despite increased attention by the international human rights community to the gender dimension of violations perpetrated during conflict, women’s experiences have generally received inadequate attention in transitional justice processes. Neglecting gendered patterns of abuse ultimately affects both women and men in their access to justice. This course will explore the evolution of transitional justice mechanisms in Africa and will analyse their successes and failure in addressing gender-based human rights violations.

DP requirements: None.

Assessment: Two short papers and one long paper (70%) and examination (30%).

**AXL4203F  PUBLIC CULTURE IN AFRICA**

HEQF credits: 24 at level 8.

**Course convener:** Associate Professor N Shepherd.

**Entrance requirements:** Acceptance for an Honours or Master’s programme.

**Course outline:** This course will explore issues in public culture as they affect Africa in a global context. As you move through the seminars you will see, through detailed examples, how public culture is shaped, and how the public expression of identity and difference is played out in spaces and buildings, heritage, music and literature. This will necessarily be an interdisciplinary journey, making use of the evidence from archaeology and history, architecture, literature and cultural studies. By the end of the semester we will have ranged from the archaeology of pre-colonial Africa to the public culture of the Internet, and across a variety of theoretical perspectives on culture.

The course falls into two parts, which are run together in practice. On the one hand, it takes the form of an engagement with theory. Through considering a few key texts, we will see how theory provides “tools to think with”, allowing us to move between general propositions and real-world examples to probe the underlying structure of the world around us.

On the other hand, students who take this course will develop a specific set of skills which will stand them in good stead in the worlds of film and media practice, heritage practice, business and advertising, and so on. In the course "Public Culture in Africa" we are specifically interested in the range of skills required in the conceptual planning and development of projects, in the phase preceding final production. In particular, we are interested in developing historically- and theoretically-informed, reflexive understandings of culture and identity, in the context of a range of heritage and media practices. What we offer is a unique convergence of theory and practice, around a number of key sites of identity and contestation: "race", "public culture", "African-ness", and the like.

**DP requirements:** None.

**Assessment:** Two essays (25% each) 50%; major project 50%

**NOTE:** Attendance at seminars is compulsory, failing which students’ papers may not be marked.

**AXL4205S  THE AFRICAN STUDIES ARCHIVE**

HEQF credits: 24 at level 8.

**Course convener:** Associate Professor N Shepherd.

**Entrance requirements:** Acceptance for an Honours or Master’s programme.

**Course outline:** In this course we take a close look at some of the key collections in the Manuscripts and Archives division of the University of Cape Town Library, and at some of the bodies of scholarly work to which they have given rise. As one of the oldest university archives in Southern African the collections speak – in image and text – of the formation of a range of discipline-based knowledges dealing with Africa. On the one hand, this takes the form of the emergence, formalization and institutionalization of a range of collecting and recording practices, fieldwork methodologies and the like. On the other hand, it takes the form of the emergence of various disciplinary discourses and their associated “objects” and “fields”. The key source of insight in the course lies in exploring how these different objects and fields are not natural or given, but have been formed and constructed in relation to specific social contexts and intellectual histories. Significant collections examined in this course include the Bleek/Lloyd collection, the Goodwin Collection and the Hahn Collection. Particular emphasis is placed on the many hundreds of photographic images that form part of these collections as a point of entry into larger disciplinary debates and concerns.

**DP requirements:** None.
Assessment: Two essays (25% each) 50%; major project 50%.

NOTE: Attendance at seminars is compulsory, failing which students’ papers may not be marked.

AXL5202F PROBLEMATISING THE STUDY OF AFRICA
HEQF credits: 24 at level 9.
Course convener: Associate Professor H Garuba.
Entrance requirements: Acceptance for an Honours or Master’s programme.
Course outline: The course looks at the relationship between power and knowledge, within the context of the history of Africa since colonialism and the development of the disciplines that study this continent. It is a relationship that helps to explain the links between colonialism and the formation of disciplines, between imperialism and language studies, in ways that not only cut across disciplines, but were in fact, responsible for formulating those disciplinary boundaries in the first place. The writings of intellectuals who have contributed to the formulation of our understanding of how and why knowledge of the continent has developed and whose interests this knowledge has served, will be examined. The disciplines that will be interrogated are: history, gender studies, social anthropology and literary studies.

DP requirements: None.
Assessment: Two essays (20% each) 40%; research proposal 10%; major project 50%.

1. Candidates registered for the Master’s in Social Anthropology Programme are required to undertake an approved research project in Social-Cultural Anthropology. It comprises an individually supervised research exercise that is based on directed reading, on participation that is regularly assessed in a graduate seminar, and on a period of field-based research (normally in southern Africa). It culminates in an ethnographic dissertation (part of which may be an ethnographic film or in new-media text). The dissertation must demonstrate that the student has well-developed skills
   - conceptualising and designing a field-based ethnographic research project that is informed by issues in the anthropological literature or that will use an anthropological perspective, drawn from the literature, to address policy or other practical social-cultural concerns;
   - developing and applying a set of methods in order to gather apposite material using a range of interrelated ethnographic techniques;
   - critically analysing empirical data and transforming them into an ethnography; and
   - structuring and preparing an ethnographic dissertation (no more than 25,000 words) that demonstrates the skills listed above.

Fieldwork should extend over a period of no less than two months. Candidates are required to write a dissertation of no more than 25,000 words (excluding appendices, notes and references) for submission for examination purposes and in accordance with the normal requirements of the University.

2. Candidates registered for the Master’s in Practical Anthropology Programme are required to complete an approved Practical Anthropology internship, based on an approved brief and that requires a written report, to write a dissertation that is based on that work and to participate regularly in a graduate seminar (for assessment purposes). The internship is based on a consultancy brief, approved by the Head of Department, for work with an agency working in the public sphere and/or in social-cultural interventions. The internship should be for a period of not less than six weeks and should require application of social anthropological methods of research and analysis for completion of a report. On completion of the internship, candidates are required to write a dissertation of no more than 25,000 words (excluding appendices, notes and references) for submission for examination purposes and in accordance with the normal requirements of the University.

3. Candidates registered for programmes other than Social Anthropology or Practical Anthropology are required to undertake an approved research project that applies anthropological perspectives to a field of study appropriate to the programme for which they are registered. It comprises an individually supervised research exercise that is based on directed reading, on participation that is regularly assessed in a graduate seminar, and on primary and/or secondary research. It culminates in a minor dissertation appropriate to the programme for which the candidate is registered.

**DP requirements:** Submission and approval of:
- Consultancy report in terms of brief.
- Chapter outline for dissertation

**Assessment:** Dissertation: 100%.

**AXL5407F  ANTHROPOLOGY AND CONTEMPORARY THEORY**

HEQF credits: 24 at level 9.

**Course convener:** Associate Professor F C Ross.

**Entrance requirements:** Candidacy in one of Master’s in Social Anthropology or Practical Anthropology, or HOD permission.

**Course outline:** Building on work covered in AXL4402S, the course is a critical examination of the interplay between contemporary theory and ethnography. Its focus is on issues of broad social concerns, the various ways in which they have been theorised, and how they are viewed from an anthropological perspective.
**Course Convener:** Dr L J F Green.

**Entrance Requirements:** HOD permission.

**Course Outline:** Traditional Ecological Knowledge is increasingly recognised as essential to the success of conservation and development work, and the data-gathering skills of scientists are increasingly called upon by rural and indigenous groups seeking to demarcate and plan sustainable use of their lands. The dialogue across knowledge bases is, however, often fraught. Focusing on knowledge about the environment, this course offers the opportunity to explore the anthropology of knowledge. Topics include the anthropology of science; anthropological approaches to the study of the environment; methodologies to facilitate data-gathering about knowledge; working with cosmologies, and the challenge of epistemological diversity.

**Assessment:** Coursework 100% (50% externally moderated).

---

**Course Name:** ETHNOGRAPHIC PROBLEMATIQUES

**Course Convener:** Professor F B Nyamnjoh.

**Entrance Requirements:** Candidacy in one of Master’s in Social Anthropology or Practical Anthropology or HOD permission.

**Course Outline:** Offered in parallel to SAN5016X, the course provides students opportunity to engage with ethnographic texts on selected anthropological themes and to develop an historical synthesis of ethnographic work pertaining to a selected anthropological research problem such as they will have to face in undertaking their own research for their minor dissertations.

**Assessment:** Term paper 100% (externally moderated).

---

**Course Name:** RESEARCH DESIGN (non-credit bearing)

**Course Convener:** Associate Professor F C Ross.

**Entrance Requirements:** AXL4401F or equivalent.

**Course Outline:** The course is designed to provide supervision for candidates registered for the Master’s in Social Anthropology and for the Master’s in Practical Anthropology Programmes. Its goal is to assist students to prepare proposals and obtain ethical clearance for the research and internships respectively required for those programmes, and that is necessary for completion of a minor dissertation (see respective requirements for the dissertations under AXL5401W).

**Assessment:** Departmental approval of an appropriate research proposal (Social Anthropology) or an internship brief and research proposal (Practical Anthropology). In both instances the proposal must satisfy the Department by explicitly addressing ethical concerns that might arise in the process of undertaking the research and/or engaging in an internship.

*Note: While this is not a credit bearing course, it is a prerequisite for AXL5401W*

*NB: Repeat registration for this course may be permitted only once without Senate permission.*

**Course outline:** This course will provide students with the experience of doing pre-production work on television drama productions. The first six weeks of the course will be done in the form of placement in production companies or seminars with industry professionals. The placement will be the joint responsibility of the department and the student. Each student will be required to identify a production company willing to mentor them in pre-production skills and then to negotiate the placement with the assistance of the department. The department will endeavour to provide students with information regarding potential placement opportunities.

The second six weeks will involve the practical application of pre-production skills to the script produced in the Scriptwriting course.

HEQF credits: 16 at level 8.

Fourth year status, first semester, one double lecture and one double tutorial per week.

**Course co-ordinator:** Professor H Abraham.

**Entrance requirements:** See admissions requirements for Honours in Economics.

**Course outline:** The course studies the principal macroeconomic approaches towards understanding short-run fluctuations in aggregate output and the longer-term determinants of macroeconomic performance. Business cycles are investigated from a traditional Keynesian and New Keynesian perspective, complemented by a discussion on monetary and fiscal policy options. HEQF credits: 14 at level 8.

Fourth year status, second semester, one double lecture and one double tutorial per week.

**Course co-ordinator:** Professor H Abraham.

**Entrance requirements:** See admissions requirements for Honours in Economics.

**Course outline:** This course is designed to help students appreciate the relationship between the economy and its financial markets so that they may better understand how the economy works how financial markets behave and how they work and interact with each other. The programme is aimed at developing a feel for the rationality of ‘the market’ and the often discordant sounds and rhythms of financial markets. We hope to develop a stronger sense of how the financial market anticipate and influence economic policy. We will interact with the data on the economy and the markets using Eviews with which students should be familiar. We will use regression analysis and other econometric techniques to build and analyse models of the economy and the financial markets. As a result students will be expected to become more perceptive analysts of published financial data and economic events and of the role played by financial markets in promoting economic development.

HEQF credits: 14 at level 8.
Fourth year status, second semester, one double lecture per week.
Course co-ordinator: Professor H Abraham.

Entrance requirements: See admissions requirements for Honours in Economics.
Course outline: This course focuses on experiments in economics, including laboratory and field experiments, as well as randomised experiments and natural experiments. As such, this course will be of interest to students interested in behavioural economics, institutions and development. The first part of the course provides an overview of economic experiments, especially those that explore the role of fairness, generosity, trust and reciprocity in economic transactions. Are humans fair? Why do we often willingly trust strangers or cooperate with them even if those actions leave us vulnerable to exploitation? Does this natural inclination towards fairness or trust have implications in the marketplace? Traditional economic theory would perhaps think not, perceiving human interaction as self-interested at heart. There is increasing evidence, however, that social norms and norm-driven behaviours such as a preference for fairness, generosity or trust have serious implications for economics. We will look at how norm-driven behaviours can often lead to significantly different outcomes than those predicted by economic theories.

In the second part of the course, we will focus on the use of randomised experiments in development. Using many of the same design ideas embodied in lab and field experiments, randomised experiments aim to test some key ideas if the field of development economics, with the aim of improving development policy and enhancing welfare at the individual, household, community and national level. We will end the course by considering alternative evaluation options that one might rely on when randomisation is not possible.

DP requirements: None.

It will then review the military spending and economic development debate, also considering the economics of offsets. Moving the focus to conflict, the greed and grievance debate, which brought economics to the centre of the debate over what causes and sustains civil war will be reviewed. Finally, the particular form economies take during wars, and the problems of post conflict reconstruction and conflict management will then be considered. 1) Financial Programming. Discussion of the IMF financial programming model and the macroeconomic linkages among the sectors of the economy.

2) Real Sector. How to analyse the real sector of the economy and interpret the national income accounts. We examine several models for projecting output and inflation, considering short and long-run factors.
3) Exchange Rate. We discuss alternative exchange rate regimes, real exchange rate models and interest rate parity. Emphasis is on understanding purchasing power parity and the role of the real exchange rate.

4) External Sector. How to interpret the balance of payments accounts, project the balance of payments, and analyse the external sector. We examine the linkages with the real sector and relationship to the monetary and fiscal sectors.

5) Fiscal Sector. How to interpret the central government’s budget, analyse fiscal policy, and project the fiscal accounts. We examine the fiscal linkages with other sectors, and discuss the measurement and meaning of the deficit.

6) Monetary Policy. How to interpret the monetary survey and central bank balance sheet. We discuss the monetary transmission mechanism and reserve money programming.

7) Sustainability. What is current account sustainability and debt sustainability? We examine the basic of public debt accumulation and policies to achieve debt sustainability.

8) Policy Design. We discuss the “desired-policy scenario” from the “no-policy-change” scenario. We see how to evaluate policy consistency across sectors and discuss the creation of financing gaps. We consider the design of policies to achieve long-run economic stability and sustainability. What are appropriate nominal anchors? We discuss alternative monetary and fiscal policies in response to a range of economic shocks.

Or by permission of the instructor and Head of Department.

**Course outline:** The main focus of the course is on recent theoretical and empirical contributions to the study of economic development, with a special emphasis on the development and testing of applied microeconomic theory using experimental and quasi-experimental empirical approaches. We believe this type of approach characterises much of the recent published work in the field and our goal in this course is to expose students to this new literature, and way of conceptualising development problems.

We begin the course with a broad survey of the state-of-the-art methodological trials (RCTs), our brief methodological survey will also touch on quasi-experimental approaches and natural experiments.

With this broad technical overview in place, students are then well equipped to look at sector-specific microeconomic studies of development interventions that employ experimental or quasi-experimental approaches. The right place to begin this interrogation is by studying the key unit of analysis that many traditional development interventions have been targeted at: the household. We begin by interrogating the assumption of dictatorial preferences and the efficiency implications deriving from this assumption. We then consider the related restriction of separability of the consumption domain from that of production, and then look at studies that have attempted to consider the implications of both sets of restrictions.

Having established the often misleading implications for policy deriving from these assumptions about preferences, we then consider a variety of contexts where this assumption has been (explicitly or implicitly) relaxed. Our approach here is to look at key factor markets: labour markets (encompassing both education and health interventions), land markets, and credit markets. We then
consider the implication (embedded in most general equilibrium models) that full insurance takes places across households. Here we consider the evidence for, as well as against, Pareto-efficient allocations of risk across households before examining the types of perverse outcomes that can arise when, in the absence of full insurance, individuals adopt \textit{ex ante} inefficient strategies to coping with risk. Finally we look at trade, and the role of institutions for economic development.

**DP requirements:** None.

**Assessment:** A substantive term paper 40%; 10% weekly tutorials and 50% final exam.

**EGS4016S** CAPITAL, POLITICS AND NATURE
HEQF credits: 30 at level 8.

**Course convener:** Associate Professor M Ramutsindela.

**Entrance requirements:** Acceptance for an Honours or Master’s programme.

**Course outline:** In this course we analyse how nature has been used as a source of informal and formal power (politics). Profound changes in such power structures led to the quest for property regimes and institutions that are more appropriate for the defence of nature. Against this background, we discuss how capitalist interests, as encoded in private property regimes and attendant ecotourism ventures, have gained an upper hand in nature conservation. Furthermore, those interests have expanded beyond narrow property regimes to embrace bioregionalism, hence the revival of transfrontier conservation areas (TFCAs) as a model for conservation in the 21st century. All these are captured in the various topics covered in this course.

**DP requirements:** At least 80% attendance record and submission of all assignments. **Assessment:** Assignments 60%; examination 40%.

The coupled nature of the physical-social systems, combined with the inherent chaotic nature of the climate and necessity of probabilistic predictive techniques, require new methods and conceptual framework in order to bring pragmatic relevance in the predictive mode. This module explores the theory related to the question of predictability, cross-scale relationships and feedbacks in the climate system, the tools and techniques of prediction, and the translation of predictions into the user community. There are three sections: climate change theory and projections; seasonal forecasting and predictions; vulnerability and impacts. Course participants will engage with operational seasonal forecasting undertaken by CSAG members.

Climate change adaptation will be explored as a means for responding to environmental change, at the local, national and international scale and from the perspective of individuals, organisations and government. Adaptation will be contextualised within the international climate policy arena and greenhouse gas mitigation responses. The communication of climate science and the frameworks for integrating this information into risk management will be another central theme.

In doing so, we will investigate what the literary might come to mean in this (ostensibly ‘factual’ or documentary)context, and how various non-fictional modes/genres are simultaneously drawn on, refashioned and blurred into each other: investigative journalism, the prison memoir, the diary, life-writing, oral history, archival reconstruction, urban studies. At the same time, we will place these local texts in dialogue with similar, generically unstable works from the rest of the world. Primary texts: Amitav Ghosh, In an Antique Land, (1992); Antjie Krog, Country of my Skull, (1998); WG Sebald, The Rings of Saturn, (2002); Jonny Steinberg, The Number, (2004); Henk van Woerden, A Mouthful of Glass, (2001); Ivan Vladislavic, Portrait with Keys, (2006)

ELL4070S DECONSTRUCTION AND CONTINENTAL AESTHETICS
HEQF credits: 24 at level 8.
Course convener: Associate Professor C Clarkson.

Entrance requirements: Acceptance for an Honours or Master’s programme.

Course outline: The aim of this course is to come to a deeper appreciation of philosophical and theoretical engagements with literary texts and other artworks. The spirit of the course is one of discussion and debate in which we assess the implications of certain aesthetic approaches for our own current research projects.

Our point of departure is Book X of Plato's philosophical dialogue, the Republic. In their quest for an understanding of justice, Socrates and his interlocutors work out an elaborate vision of the ideal state; they reach the conclusion that poetry ought to be banished from it. What is the relation between philosophy and literature, and how best to negotiate the tensions when it comes to reading philosophical texts and writing literary-critical essays?

In the course of the semester, we move onto a discussion of Plato’s Symposium and several other seminal nineteenth-century and contemporary essays in aesthetics.

Set texts:
Plato, Republic and Symposium. Please see that you have your own copies of these dialogues.

DP requirements: Attendance at all seminars and submission of all written work.

Assessment: Three essays/assignments of 2500 words each. Attendance at seminars is compulsory, failing which students’ papers may not be marked.

We will also discuss Civil Rights and Black Consciousness in the Harlem Renaissance as they contributed to the growth of Netritude writings in French and Portuguese Africa. The course provides a background to a literary understanding of the works of African literature and their production. The course will demonstrate through examples of texts from Africa some of the influences of these ideas in African literature. The focus will be on the critical debates about the influential ideas/theories and their implications on critical reading and evaluations of African literature.

ELL5027F  CREATIVE WRITING WORKSHOP
HEQF credits: 24 at level 9.
Course convener: Associate Professor I Coovadia
Entrance requirements: The workshop is the centre of the creative writing program. It is coded as a graduate seminar and will meet for the same number of hours throughout the semester but, as is
common practice in an arts programme, it is organized around the discussion and improvement of student writing rather than the transmission of knowledge. Issues of technical interest to prose writers as well as poets—like narrative point of view, the construction of scenes and dialogue, poetic metre, and authorial voice—come up in the workshop as they are raised in the practice of its members. The workshop meets once a week to consider the submissions of up to four of the participants. It is expected that a student will submit a minimum of 40 pages of writing during the course of the semester. The workshop intends to introduce students to writing as a self-conscious art, learned by doing, and to prepare them to begin the creative dissertation. Students are expected to perform as readers of each other’s work, to write new material of their own, and revise their writing for later submission in response to workshop discussion.

**DP requirements:**

**Assessment:** Assessment: 25% based on participation; 75% based on writing submitted during the course.

**LITERATURE AND MODERNITY I**

**HEQF credits:** 24 at level 9.

**Course convener:** Associate Professor H Garuba.

**Entrance requirements:** Acceptance for an Honours or Master’s programme.

**Course outline:** *African Fictions*

The course is divided in two parts:

1) Issues of modernity and postcoloniality. This section of the course focuses on the self-constitution of Modernity and its Other, constructed in binary relations, such as the pre-modern, the traditional, the primitive and so on. The course explores this through the categories of Reason and Subjectivity, Time and Space, and the Normative Body and then examines the relationship between modernity, colonialism and post colonialism. This section covers the first phase of post-independence.

2) Questions of migration and globalisation. We move in this section of the course to the more recent period and examine the impact of migration and globalisation on the social, political and aesthetic preoccupations of African writers, who live and write outside of Africa - in Europe or North America.

In both sections of the course we will examine critical readings in order to develop conceptual tools for reading primary texts by African writers. In other words, each part will consist of three seminars that grapple with theoretical issues, and three seminars that read specific literary texts in the light of those theoretical issues.

**DP requirements:** Attendance at all seminars.

**Assessment:** Two essays of 5,000 words each. One essay should cover the first part of the course and the other the second part. Attendance at seminars is compulsory, failing which students’ papers may not be marked.

It will take the form of five ‘conversations’ around epochal texts and contexts. Each ‘conversation’ entails the presentation of two twinned seminars by a member of the Department, the first of which solicits discussion around social context and the history of ideas in anticipation of the second seminar’s consideration of a pertinent literary text (or texts). The object of the course is to develop a sense of the historical development of Modernity and its contexts.

**Course outline:** This course investigates the ways in which language comes up against limits when attempting to represent trauma or ‘unspeakable’ pain. Trauma theorists are occupied with the paradoxical ways in which traumatic experiences seem to defy representation, while simultaneously calling for testimony, telling and story. We will read some of the literature that wrestles with this paradox, both fiction and non-fiction, and will reflect critically on the idea that testimonial literature – literature that bears witness to trauma – facilitates ‘healing’, specifically in relation to Holocaust, Apartheid and slave narratives.

**DP requirements:** Submission of all written work and at least 75% of seminar attendance.

**Course convener:** Associate Professor M P Botha.

**Entrance requirements:** Acceptance for an Honours or Master’s programme.

**Course outline:** Classes meet twice a week, once for film screenings and once for a two-hour discussion period. The course will comprise an in-depth discussion on authorship and the great auteurs in film history such as Ingmar Bergman, Andrei Tarkovsky, Federico Fellini, Michelangelo Antonioni and many others. We shall engage with this material through detailed formal analysis as well as through an exploration of central debates and issues in film theory. Debates about auteurism in the cinema occupied a privileged position in film studies from the 1950s until the early 1980s. This course will focus on the development of auteur theory from the fifties till the present day. Authors in mostly European cinema will serve as case studies. According to various scholars (e.g. Cook, Maule) the film author is not only the most important symbol of European cinema’s cultural tradition and commitment, but is also a crucial part of Europe’s efforts to develop its cinema within domestic and international film industries. The relationship between melodrama and authorship in the cinema will also be explored, as well as Body Theory. The course is thus a combination of film history, narrative and theory.

Equally important is the analysis of the films in terms of film language, and the extent to which film produces original representations of environmental debates that characterize the current age. In this second aspect of the course lies the history of the natural environment in film (its place in well-established and popular genres like the Western and Science Fiction, for example), as well as the representation of people in relation to the nonhuman environment. There is no simple road map on how to do oral history interviewing. Rather, training in oral history methodology is a learning process of how to make a series of research decisions appropriate to specific social, cultural and historical contexts. Students will learn how to do interviews on audio and video, and will explore applied theoretical approaches to oral narratives and memories. You will
also explore questions of copyright, ownership, audio-visual archiving and the ways in which oral history can contribute to development practice. All students will have to complete an oral history project which could become a pilot study for an Honours, Master’s or doctoral dissertation.

**PBL5623F GOVERNING UNDER THE CONSTITUTION: LAW AND PRACTICE**

HEQF credits: 30 at level 9.

Higher postgraduate course, first semester, one seminar per week.

**Course co-ordinator:** Professor P de Vos.
Prerequisites: See Rules for LLM and MPhil Degrees and Postgraduate Diplomas in Faculty of Law.

Course outline: South Africa’s new Constitution sets out the rights of citizens and establishes a framework for democratic governance and local government. In developing these institutions, along with a multi-level system comprising national, provincial and local government, South Africa’s constitutional designers were responding to the needs and aspirations of contemporary South Africa. But they, in light of this comparative experience, also had before them a rich array of alternatives from other countries. The central purpose of this course is to seek to understand the new framework for governance in South Africa.

Constitutions are complex mixtures of broad principles, and specific rules and institutions. Accordingly, we will be interested in two levels of analysis: first, what broad principles and values underpin the institutional framework, and how are these expressed in the institutions themselves? And, second, more practically, how do these institutions, and the interactions among them, actually work in shaping the process of policy-making and implementation? Thus we are interested in the values associated with democracy – participation, accountability, consensus, etc; and in those associated with what might be called ‘effective governance’, in light of the policy challenges which face the country.

The course will thus also provide you with an understanding of how government works with a focus on
a) the relationship between the executive and the legislature and what that means for lawyers and
b) the relationship between national, provincial and local government.

Our study of multi-level government and the powers of each sphere of framework necessary for policy making and litigation in this area.

Lecture times: To be arranged.

DP requirements: Satisfactory attendance at and participation in seminars and completion of written assignments.

Assessment: Written assignments count 30%, written examination counts 70%
**PBL5634F**  HUMAN RIGHTS LAW
HEQF credits: 30 at level 9.
Higher postgraduate course, first semester, two lecture periods per week.

**Course co-ordinator:** Associate Professor R Calland.

**Prerequisites:** See Rules for LLM and MPhil Degrees and Postgraduate Diplomas.

**Course outline:** The South African Bill of Rights expressly declares itself to be the 'cornerstone of democracy' and affirms the democratic ideals to which the post-apartheid society is committed. It represents a decisive break with the past and is a manifestly transformative document. The listed rights range from property rights to justifiable socio-economic rights; there are affirmative state duties to promote and protect rights; class actions and public interest litigation are permitted; and there is provision for 'horizontal' application of some of the rights. The courts have developed a significant body of case-law. The Constitutional Court has, for example, pronounced on issues as varied as the death penalty, housing and the provision of anti-retroviral drugs to HIV-positive pregnant women.

This course will provide students with an understanding of the South African Bill of Rights. It will consider in detail the jurisprudence of the Constitutional Court, and where appropriate, the Supreme Court of Appeal and international and comparative human rights law.

The course will begin with a discussion of judicial review and the success of human rights litigation. A general overview of the operational provisions of the Bill of Rights, including the provisions dealing with application, interpretation and limitation of rights, will follow. The focus here will be the extent to which the courts are developing a theory of deference which balances protection of rights with the principle of separation of powers. This part of the course will also consider the record of the courts in developing the common law in the light of the Bill of Rights.

A critical analysis of the jurisprudence of the courts on selected rights will follow. The focus will depend on the interests of the class, but core rights such as equality, dignity, freedom of expression and religion will be generally be considered. There will also be a discussion of the jurisprudence of the courts on socio-economic rights and the extent to which the inclusion of socio-economic rights in a Bill of Rights has influenced judicial rights discourse.

**Lecture times:** To be arranged.

**DP requirements:** Satisfactory attendance at all lectures and participation in class seminars.

**Assessment:** Participation in seminars and written assignments count for 50% of the mark and the final examination counts for 50%.

**NOTE:** The course co-ordinator may at his/her discretion limit the size of the class to 15 students.

**Course co-ordinator:** M von Broembsen.

**Prerequisites:** An LLB or Honours degree in selected Social Science disciplines.

**Course outline:** This course is concerned with social justice in practice. Our touchstone is the transformative vision embodied in the Constitution of South Africa, as we reflect on the interplay between rights, social mobilisation, advocacy and developmental strategies within a participatory democracy. Using ‘Legal Empowerment of the Poor’ as a lens, the course reflects on notions of empowerment; how power (including our own) impacts on and shapes the practical outworking of social justice and at times results in unintended consequences. The main focus of the seminars is on practical strategies intended to facilitate social justice. Students will study the theory in each area and undertake selected site visits to projects that reflect Best practice. Students are assigned to work with a civil society organization for the duration of the course. Each student will be required to spend 32 hours with the organisation, spread over the period of the course. The course concludes with the design and implementation of a small-scale development intervention by the student, in conjunction with the civil society partner.

**Lecture times:** To be arranged.

**Assessment:** Participation and class assignments count 50%; practical project instead of written exam counts 50%. Students are required to pass the practical project in order to pass the course.

HEQF credits: 30 at level 9.
Higher postgraduate course, second semester.

Course co-ordinator: K Phelps.

Prerequisites: See Rules for LLM and MPhil Degrees and Postgraduate Diplomas.

Course outline: This course aims to provide students with a sound theoretical understanding both of the justifications of punishment and human rights constraints in the context of sentencing. Students then apply this understanding to practical examples in order to assess how/if the theory translates into practice. In so doing it is hoped to transcend a common-sense approach to sentencing and punishment and to build firm opinions/approaches based on acquired knowledge.

The course is divided into four broad sections. The first section introduces the class to the various philosophical justifications that have historically been provided for sentencing. A brief introduction is also provided to the relationship between human rights law and penal sanctions. The second section explores in detail the current justifications for punishment/purposes of the correctional system. In so doing, issues such as deterrence, incapacitation, rehabilitation, restoration, retribution and just deserts will be explored. Section three deals with constraints placed on sentencing in South Africa by human rights norms contained in the Bill of Rights and international law. The final section of the course places the preceding theoretical/philosophical discussions into a practical context by dealing with current and future sentencing practice in South Africa. Modes of implementing punishment (prison, community sanctions) and special stakeholders in punishment (minority groups, children) will also be considered.

HEQF credits: 24 at level 8.
Course convener: Dr K Smith.

Entrance requirements: Admission to an Honours or Master’s programme, and by permission of the course convener.

The second part of the course will explore the western-centric nature of IR as a discipline, and the resultant problems in applying IR theory to the developing world, and Africa in particular. We will ask questions such as: How ‘international’ is IR theory? Can the theories we have looked at satisfactorily make sense of the challenges confronting the majority of the world’s population? Can we assume that an African / Asian / Latin American perspective on IR will necessarily be different from a European or North American one? Do we need to look beyond the narrow confines of the discipline of IR to understand international relations? What is / should the future of IR theory (be)?

**REL4048S  CRITICAL THEORY**

HEQF credits: 24 at level 8.

**Course convener:** Dr L Blond.

**Entrance requirements:** Acceptance into an Honours programme.

**Course outline:** All religious traditions have been fundamentally altered by their encounters with modernity. Enlightenment reason and the growth of secularism have continually challenged and eroded not only religious traditions but also the foundations of Western political culture in general. In order to understand this process, a new mode of theoretical investigation arose in the early 20th century which became known as Critical Theory.

Critical Theory allows an exploration of not only the social processes but also the modes of investigation including the dominant forms of Western reasoning that requires analysis and critical engagement.

This course will introduce students to a variety of thinkers and concepts enabling them to understand and study a range of phenomena and social processes. Thinkers such as Max Horkheimer, Theodor Adorno, Walter Benjamin, Michel Foucault, Franz Fanon and Judith Butler will be studied in order to gain critical insight into contemporary problems. The concepts and methodology of critical theorists will be examined thereby giving students the tools to enter crucial debates surrounding subjectivation, power, gender, post-colonial theory and aesthetics.
