

MISSION STATEMENT

UCT aspires to become a premier academic meeting point between South Africa, the rest of Africa and the world. Taking advantage of expanding global networks and our distinct vantage point in Africa, we are committed through innovative research and scholarship, to grapple with the key issues of our natural and social worlds. We aim to produce graduates whose qualifications are internationally recognised and locally applicable, underpinned by values of engaged citizenship and social justice. UCT will promote diversity and transformation within our institution and beyond, including growing the next generation of academics.

Foundation statement underpinning the mission statement

Our research-led identity is shaped by a commitment to:

- academic freedom as the prerequisite to fostering intellectual debate and free inquiry;
- ensuring that research informs all our activities including teaching, learning and service in the community;
- advancing and disseminating knowledge that addresses the key challenges facing society – South African, continental and global;
- protecting “curiosity driven” research;
- nurturing and valuing creativity in the sciences and arts including the performing and creative arts;
- stimulating international linkages of researchers and research groupings;

We strive to provide a superior, quality educational experience for undergraduate and postgraduate students through:

- providing an intellectually and socially stimulating environment;
- inspired and dedicated teaching and learning;
- exposure to the excitement of creating new knowledge;
- stimulating the love of life-long learning;
- the cultivation of competencies for global citizenship;
- supporting programmes that stimulate the social consciousness of students;
- offering access to courses outside the conventional curricula;
- attracting a culturally and internationally diverse community of scholars;
- guaranteeing internationally competitive qualifications;
- offering a rich array of social, cultural, sporting and leadership opportunities;
- providing an enabling physical and operational environment.

In advancing UCT as an Afropolitan university, we will

- expand our expertise on Africa and offer it to the world;
- extend our networks on the continent, along with our global connections and partnerships;
- promote student and staff exchanges and collaborative research and postgraduate programmes;
- engage critically with Africa’s intellectuals and world views in teaching and research;
- contribute to strengthening higher education on our continent.

We strive to provide an environment for our diverse student and staff community that:

- promotes a more equitable and non-racial society;
- supports redress in regard to past injustices;
- is affirming and inclusive of all staff and promotes diversity in demographics, skills and backgrounds;
- offers individual development opportunities to all staff;
- is welcoming as a meeting space for scholars from Africa and around the world.

The University has made every effort to ensure the accuracy of the information in its handbooks. However, we reserve the right at any time, if circumstances dictate (for example, if there are not sufficient students registered), to

- (i) make alterations or changes to any of the published details of the opportunities on offer; or
- (ii) add to or withdraw any of the opportunities on offer.

Our students are given every assurance that changes to opportunities will only be made under compelling circumstances and students will be fully informed as soon as possible.

Teaching and Learning Charter

Mutual Commitment

Benefiting from the opportunities of education requires a mutual commitment on the part of both student and teacher.

Students should understand that, by accepting the offer of a place at the University, they undertake responsibility for their own learning. This requires that they attend classes, tutorials, practicals and other scheduled activities and prepare assignments to the best of their ability, handing in work on time. Students should be considerate to the needs of others in their behaviour in lectures and tutorials. They should act with honesty and integrity, ensuring that work that they hand in is their own, that all the sources they use are properly acknowledged, and they respect and follow the rules and procedures for formal examinations.

Good teachers bring enthusiasm, originality and flair to their work. Good teaching is best fostered in a collegial atmosphere where codes of practice provide a baseline standard for professionalism, rather than serving as a prescriptive and proscriptive list of requirements. While Heads of academic departments are formally responsible to Senate for teaching and learning in their departments, individual members of the academic staff are accountable for their contribution to the university's educational mission. Teachers should understand that, by accepting employment on the academic staff of the University, they undertake to provide all reasonable assistance to students to enable them to succeed in their studies. This requires that they deliver lectures and other scheduled classes and make every reasonable effort to make alternative arrangements if they are unable to do so. Teachers should be available for student consultations at reasonable and clearly-advertised times, and should hand back student work timeously, and with appropriate comment. Teachers' expectations of students should be clearly set out in course outlines, available before the course starts. Required reading and other preparation should be clearly specified, and teachers should ensure that such materials are available to students in the Library, in text books that are available, and in authorized course readers. Methods of evaluation and assessment that will be used in the course must be defined and described in the course outline and followed in the course. Expectations of students in formal examinations must be set out, and such formal examinations must have a fair and reasonable relationship with the ground covered in the course. Consequently: Students should make a formal undertaking, as part of the process of admission to the University, to take responsibility for their own learning, to respect the requirements of the courses for which they register, and to take part in the academic life of the University with integrity and honesty.

Academic staff undertake to

1. provide clearly written course outlines, setting out what is expected of students for the complete course, that are available well in advance of the beginning of the course, to allow students adequate time to prepare;
2. provide lists of required and recommended reading for courses, in advance of the beginning of the course, and to establish that this material is in the University Library, in local bookshops (by timeous submission of reading lists), or in course readers (with copyright clearance, and within agreed policy for course levies);
3. set out a clear and well designed system of assessment for the course, which defines what is expected of a student, and the relative value of different coursework, test and examination components; set clear and consistent DP requirements for courses, consistently enforced;
4. present lectures and tutorials in a clear manner, explaining technical terms where appropriate;
5. establish a fair and consistent approach to hearing requests for concessions and re-marking of assignments, and for leave of absence from lectures (where attendance is compulsory), tutorials and other class sessions;
6. adhere to an agreed and published timetable for lectures, tutorials and other teaching sessions, that respects the need of students to plan their class attendance and study time;

6 GENERAL INFORMATION

7. ensure that they, and other teaching staff involved in their courses, are available to meet with students at advertised office hours, and interact with students without discrimination or favouritism;
8. return work submitted for assessment within a reasonable period of time, with adequate and appropriate comments and other forms of evaluation, and ahead of formal examinations, so that students can incorporate feedback in their examination preparation;
9. ensure consistent marking of examination papers and, for large classes, effective moderation of examination marking by the lecturer concerned;
10. organize a written evaluation for each course, allowing students to express their views freely and, if they wish, anonymously, and build on the outcomes of such evaluations in adapting the course for the future.

Postgraduate students have particular needs, and the relationship between postgraduate students and their supervisors is set out in a parallel policy*, which should be read in conjunction with this Teaching and Learning Charter.

** The specific requirements and responsibilities of Masters/PhD students, and their supervisors, are detailed in the Memorandum of Understanding entered into between students and their supervisors, and updated with an annual supplement in all subsequent years prior to the renewal of the candidate's registration.*

Abbreviations and Definitions

Programme of study:

A degree or diploma curriculum e.g. the BA degree, or the Performer's Diploma in Theatre.

Course:

A subject course with a duration of one semester (usually coded F or S), or covering a semester's work but spread over the year (usually coded H). A whole-year course (usually coded W) is equivalent to two semester courses.

Major:

A sequence of subject courses at first, second and third year levels defined by the Department teaching the course as a major in that subject.

Senior course:

A subject course which requires prerequisite(s) to be completed in a previous year and which the Faculty of Humanities has recognised as having senior status.

Prerequisite course:

A subject course which a student must have completed in order to gain admission to a senior course.

Co-requisite course:

A subject course for which a student must be registered concurrently with another course.

Exemption:

Exemption from a course means that the course is recognised as a prerequisite for a following course, but that it does not count as a credit.

DP requirements:

The classwork and test results which must be achieved in order to be allowed to write the examination in a course (DP = duly performed).

Part-time student:

A *bona fide* part-time student in a postgraduate course of study.

Long-term student:

A student who due to work commitments or other duties cannot carry the normal workload and takes the Bachelors degree over a period of up to a maximum of five years.

Finalist:

A student who is expected to complete all requirements for his/her degree in the year of registration.

Structure of Course Codes

Every course in this Handbook has a course name and a course code (or catalogue number).

The code structure is uniform and it gives important information about the course. Each code has eight characters, as follows: **AAA1nnnS**, where

AAA	is a 3 alpha-character group identifying the department
1	is a number representing the year of study in which the course is usually taken
nnn	is a 3 character number that identifies the course uniquely
S	is a single alpha-character suffix, giving information about the course

Suffixes which are most frequently used in the Faculty are:

F	First semester course
S	Second semester course
W	Whole-year course
H	Half-course taught throughout the year
Z	Non-standard period

Summer/Winter Term courses:

P	November - December
U	November - January
L	June -July

The following examples show how the codes work:

ELL1013F English Literary Studies

ELL	designates an English course
1	designates a first year course
013	serves to distinguish this course from other first year English courses
F	designates a first semester course

HST2035S Gender and History

HST	designates a History course
2	designates a second year course
035	serves to distinguish this course from other second year History courses
S	designates a second semester course

- Discourse of Art 1 at the University; or
- History of Art 1 through the University of South Africa.

Failure to complete the course by the end of the year for which readmission was granted would mean that the candidate would not be permitted to renew his/her registration in the Faculty until such time as evidence has been submitted that he/she has completed Discourse of Art 1 or an equivalent course.

- 23.2 Subject to the provisions of Rule F5, a candidate who fails in Discourse of Art 2 course(s) or a BA subject in two consecutive years will only be considered for readmission once he/she has passed the equivalent failed course(s) through the University of South Africa.

Named programmes leading to the BA and BSocSc degrees

7.1 The following programmes lead to the BA degree:

Film and Media Production
Theatre and Performance

7.2 The following programmes lead to the BSocSc degree:

Philosophy, Politics and Economics

7.3 The curriculum requirements for each named degree programme are published in this Handbook. No deviations from these requirements are permitted except in exceptional circumstances and only with permission of Senate.

**Guideline to the taking of courses at other institutions as part of a UCT degree
(see rule F18 above)**

Under limited circumstances, a concession may be granted to complete a course at another institution (concurrent registration). These circumstances include:

- (a) a timetable clash that has occurred as a result of a change made after the student has embarked on study/curriculum;
- (b) a course which is not part of the student's major that has been failed twice before and which cannot be replaced by another elective.

In all cases, the student must obtain permission in advance. In the case of (a) above, consideration will only be given if the course is not offered in Summer Term or Winter Term, or can be taken in another year of full-time study.

In cases where a student has one remaining non-major course to complete the degree requirements and such course has been attempted and failed previously, permission may be given to complete such a course elsewhere to prevent hardship that may arise from having to return especially to complete the sole remaining course. Permission to take a sole remaining course elsewhere must be obtained in advance.

FILM AND MEDIA PRODUCTION [Bachelor of Arts] HB054

Convener: Dr T Bosch (Centre for Film and Media Studies)

Notes for intending Film and Media Production students:

1. Applicants will not be admitted into the Film and Media Production programme in their first year. All intending F&MP students will register for the first year of a general Bachelor of Arts degree with double majors in Film and Television Studies and Media and Writing. Intending F&MP students must thus make sure that they are registered for FAM1001F and FAM1000S in their first year, and are also advised to select courses towards additional majors.
2. Final selection for this programme is made by a panel and only occurs in the second semester of the second year. Entry is competitive and applicants will be judged on the basis of their academic records and portfolios. Candidates may also be interviewed. (Further details about the selection process are available from the Centre for Film and Media Studies.) Students who are not selected for admission to one of these courses will remain registered in the general bachelor's degree and, providing they have passed the relevant first- and second-year courses, are eligible to continue in the Film and Television Studies and/or Media and Writing majors. Students whose applications for the Production programme are successful will move into the Production programme, and their registration will be updated.
3. Students who wish to be considered for selection for the production stage of the programme must apply to the Centre for Film and Media Studies by the stipulated date in May of their second year. To be considered for admission, students are required to submit an approved portfolio containing:
 - (a) The applicant's academic transcript indicating an average of at least 65% for the courses completed during the first year of study. Students must have passed at least six 100-level semester courses in the immediate previous year of study, including:

It introduces key concepts concerning gender and sexuality, culture and identity, context and the dynamics of masculinity and femininity. It explores connections between gender, 'race', class, generation and location and draws on a number of different resource materials: research, visual materials (documentaries, film, media, art), and the current work of a range of professionals who use gender analysis as part of their day-to-day careers as lawyers, surgeons, activists, and film-makers.

Lecture times: 5th period.

DP requirements: Students are expected to attend all classes, and to submit all required assignments by deadlines identified in the course curriculum.

Assessment: One two-hour examination in November counts for 40%; classwork counts for 60%.

The course will offer an introduction to debates around the gendered impact of different economic and political development trajectories, and policies, such as industrialization, agricultural transformations, democratisation, and contemporary structural adjustment programmes. Case studies drawn from different regions and contexts will be used to illustrate the theoretical debates, including those distinguishing "women in development" approaches from "gender and development" approaches.

Lecture times: 3rd period.

DP requirements: Completion of all semester coursework by deadlines as specified on course curriculum.

Assessment: One two-hour examination in October/November counts for 40%; classwork counts for 60% of the final mark.

**AXL2100F GENDER, SEXUALITY AND POLITICS: DEBATES
IN CONTEMPORARY AFRICAN CONTEXTS** (was AGI2002F)

HEQF credits: 24 at level 6.

Second year, first semester course, 4 contact periods a week.

Convener: Dr H Scanlon.

Entrance requirements: AXL1100S (was AGI1000S) recommended; students who have completed at least 4 full courses (or the equivalent) at the 1000 level are admitted.

Course outline: In the second half of the twentieth century, African countries began to take shape as states formally independent from colonial governance. While there is no uniform narrative to be told about the different circumstances through which this independence was achieved, it is true to say that the past fifty years have witnessed dramatic changes in the shape, cultures and politics dynamic of states as different as Uganda, Sudan, South Africa, and Nigeria. Alongside these changes have come many debates about gender and sexualities, debates which have catalysed discussion and conflict about the meaning of the "democratic" state, the advantages and disadvantages of legal reform, the relationship between the "modern" and the "traditional," and the relationship between African contexts and the political agendas and interests of other contexts.

The course explores a number of these debates about gender and sexualities as a way both of deepening knowledge about the politics of gender internationally, and of exploring the complexity of different African contexts' engagement with political change, war and conflict, and cultural challenges.

Lecture times: 3rd period.

DP requirements: Students are expected to attend all classes, and to submit all required assignments by deadlines identified in the course curriculum.

Assessment: One two-hour examination in June counts for 40%; classwork counts for 60%

Entrance requirements: AXL2100F (was AGI2002F) and one of the following electives: HST2035S, REL2047F, AXL2402S (was SAN2015S), AXL2401F (was SAN2026F), SOC2004S,

or permission of the course convener.

Course outline: In this course we will examine how women's movements have emerged in the context of struggles against other forms of social injustice and have informed theories about gendered oppression. Focussing on women's and feminist movements mainly in the South and East, the course examines how feminist theories have not only been shaped by the specificities of the local contexts and struggles; but also how they have been shaped by the global flow of information about women's and queer movements elsewhere. In addition, we examine how the questions that feminists and women activists have raised have destabilised the taken-for-granted assumptions about masculinities. We will also take a brief look at the construction and multiple meanings of sexuality and masculinities, especially in African contexts. The course is designed to acquaint students with literature about women's and feminist movements in the non-western world. It encourages students to think critically about the relationship between theories and practice, as well as about the applicability of feminist theoretical concepts across diverse contexts. Coursework is also designed to develop students' writing and seminar presentation skills.

Lecture times: 4th period.

DP requirements: Completion of all written coursework by deadlines as specified on course curriculum.

Assessment: One two-hour examination in June counts for 40%; classwork counts for 60% of the final mark.

AXL3101S THE POLITICS OF GENDERED KNOWLEDGE (was AGI3001S)

It also explores some of the key challenges of engendering knowledge, feminist perspectives on research and a range of questions - political, theoretical and methodological - pertinent to African feminists and African-based researchers in the social sciences. The course involves a high level of participation, group work and co-operation, linking course discussion and readings in a specially designed research process to enable students to engage in *doing research*.

Lecture times: 4th period.

DP requirements: Completion of all semester coursework and research assignments by deadlines as specified within the course curriculum.

Assessment: One two-hour examination in October/November counts for 30%; research assignments count for 70% of the course mark.

AXL1200S AFRICA: CULTURE, IDENTITY AND GLOBALISATION (was CAS1001S)
HEQF credits: 18 at level 5.

First-year, second-semester course, one lecture and one compulsory tutorial per week.

Convener: Associate Professor N Shepherd.

Entrance requirements: This course is for non-Humanities students only.

Course outline: This is a service course designed specifically for non-Humanities students preparing themselves for life of professional practice. Broad-based and introductory, it is intended to satisfy the Complimentary Studies requirements of professional institutes (like the Engineering Council of South Africa). It does this by focussing on contexts and ideas which will be of direct benefit in professional practice, as well as on more abstract ideas which are generally enriching. The course takes a case-study approach, sampling a range of materials as a way of introducing students to some of the key words and concepts in Humanities-type study. Throughout, the emphasis is in finding readily accessible points of entry into sometimes complex issues and discourses, as well as providing "tools to think with": conceptual tools and an associated critical vocabulary. It does so specifically in the context of post-apartheid South Africa and also of the intensified effects of globalisation.

Lecture times: Friday, 5th period.

DP requirements: None.

Assessment: Two assignments count 15% each; one group project counts 20%; one 2-hour examination counts 50% of the final mark.

Note: 1) Attendance at tutorials is compulsory, failing which students' papers may not be marked.

2) Please note that this course does not count as a credit towards a Humanities degree.

AXL2200S CULTURE, IDENTITY AND GLOBALISATION IN AFRICA
(was CAS2001S)

HEQF credits: 24 at level 6.

Second-year, second-semester course, three lectures and one compulsory tutorial per week.

Convener: Associate Professor N Shepherd.

Entrance requirements: Students must be in their second or subsequent year of study.

Course outline: "Thinking Africa Differently". We have grown used to a particular way of thinking and writing about Africa: a set of images, tropes and ideas; a particular language; a particular version of Africa's place in history; a particular version of Africa's participation in the major movements and phenomena of our time. It is probably fair to describe this as a 'dominant discourse' in the sense that it is constitutive of many of the ideas and images of Africa that circulate in everyday life. We ask the question - which is also a challenge - what it would mean to escape this dominant structure of ideas, to 'think Africa differently'. This is a question with both theoretical and methodological implications. On the one hand, we need a set of strategies and approaches to evade and outwit this dominant discourse. On the other hand, we need a set of guiding ideas, concepts, and the resources of a critical intellectual tradition. In this course we will take a two stage approach, with the aim of drawing together theory and methodology. In the first place, we identify the elements of the dominant discourse as they appear in a set of historical and contemporary phenomena, readings, case studies. In the second place, we propose a set of strategies for countering this discourse, and

look at alternative and oppositional forms, traditions, and practices that have emerged and are emerging.

Lecture times: Tuesday, Wednesday, Thursday, 6th period.

DP requirements: None.

Assessment: Two assignments count 15% each; one group project counts 20%; one 2-hour examination counts 50% of the final mark.

Note: Attendance at department seminars is compulsory, failing which students' papers may not be marked.

Introduction

The development by human beings of the power to communicate with one another by means of language, and their subsequent and continuing co-operative use of that power in transforming the world they live in, are among the most significant determinants of the human condition. Scholars have been inquiring into the origins, history, mechanism, structure and social roles of language and languages since the very beginnings of the intellectual tradition. Courses in this section not only offer an introduction to the range of such inquiries and an opportunity to participate in them, but above all foster the idea that an attempt to grasp the nature of language is an indispensable part of any serious attempt to understand what it is to be human.

HEQF credits: 18 at level 5.

First-year, first-semester course, 3 lectures and 1 tutorial per week.

Convener: Associate Professor A D Spiegel.

Entrance requirements: None.

Course outline: How might one explain the beginnings of our species and diversity of human social, cultural and linguistic forms that have arisen as humans have developed into and now live as modern people? The course compares approaches taken by archaeologists, linguists and social-cultural anthropologists in their attempts to answer such questions. We delve into what lies behind the many ways people interact, communicate and use the material resources around them. Using examples from a wide variety of social, cultural, linguistic and ecological contexts, we address debates about the idea of human evolution; about the relation between nature and nurture and its links with concepts such as race, gender and kinship; and about the social-cultural underpinnings of language use and linguistic variations. A core theme is to understand and recognise the limitations of a cultural relativist approach. A core goal is to introduce students to critical academic skills that enable us to understand the bases on which new knowledge is developed and thereby to recognise how provisional knowledge is.

Lecture times: 1st period.

DP requirements: Attendance at tutorials and submission of all written work, plus class test.

Administrative Manager:

L Jacobs

The Centre was constituted in 1976 and built on the work of the School of African Studies which had been in existence for over fifty years and was one of the oldest in the world. Current scholarship takes place within the context of the mission of CAS, which promote scholarship in the various fields concerned with people in Africa. The brief remains focused on providing a critical comparative perspective between Southern Africa, Africa, and the globalizing world. The mission remains urgent, given the longstanding and continuing dominance of Western models and discourses. The Centre houses research projects, organizes a range of seminars, conferences, and talks, and runs a gallery open to a wide variety of cultural performances.

Research Chairs

Professor C Hamilton - Archive and Public Culture:

Professor Hamilton was recruited to this position in view of the strategic significance of the country's archival estate for the national priority of developing social cohesion. The appointment was made in view of UCT's already significant investments and achievements, across a number of disciplines, in critical archival engagements, archive curation projects and collaborations with public culture institutions, including collaborations in heritage training carried out in partnership with the University of the Western Cape.

Contact details: Carolyn.Hamilton@uct.ac.za or 021 650 4506.

Professor R Mesthrie - Migration, Language and Social Change:

Professor Mesthrie was appointed to this position in view of the significance of Sociolinguistics in understanding heritage, culture and social change in a multilingual society. The chief focus of the research chair will be on migration, language and social change, examining sociolinguistic practices "from below" in relation to the fostering of multilingualism, the further intellectualisation of local languages and the continuing prestige of English. Professor Mesthrie will continue as President of the Linguistics Society of Southern Africa.

Contact details: rajend.mesthrie@uct.ac.za or 021 650 5236.

Professor L Ntsebeza - Land Reform and Democracy in South Africa: State and Civil Society Dynamics:

Professor Ntsebeza is a UCT Principal Researcher in a major joint research project involving UCT and the Human Sciences Research Council. This project focuses on the Land Reform programme in South Africa with specific reference to the land rights of rural women. He continues to lead this project and uses it as a base to develop and highlight the importance of conducting research on the land question, a topic that is often marginalised in South Africa.

Southern African Khoisan hunter-gatherers and herders have contributed significantly to our understanding of such societies. In this course, we focus on hunting and gathering as a way of life in Southern Africa from some 20 000 years ago to the twentieth century, concluding by considering the contemporary socio-political environment in which many South Africans are (re-)connecting to a Khoisan identity. What lies behind the linguistic map of modern South Africa? What are the links between human biology, culture and language? We use the archaeological record of artefacts, settlement systems, food waste, environmental contexts and human skeletons to look at population movement, assimilation, conflict, co-operation and domination. We explain the origins of current demographic patterns, problematise the notion of 'settler' and explore the rich and diverse heritage of the making of South Africa.

Lecture times: 4th period.

DP requirements: Attendance at practicals, completion of assignments.

Assessment: Assignments and class tests count 50% towards the final mark and one 3-hour examination written in June counts 50%. A sub-minimum of 40% is required for the examination.

AGE3012S GLOBAL INTERACTION AND THE TRANSFORMATION OF SOUTHERN AFRICAN SOCIETY

HEQF credits: 36 at level 7.

Third-year, second-semester course.

Convener: Dr S Hall.

Entrance requirements: AGE2012F or AGE2011S, or by permission of the Head of Department.

Course outline: Over the last thousand years, trade, population movements and exploratory settlement led to massive impacts on indigenous economies in southern Africa. In AGE3012S we look at these transformations from both foreign and local viewpoints. The archaeological record of Indian and Atlantic Ocean expansions record events of great significance and drama, including the process of colonisation, slavery, genocide and eventually apartheid. Material culture, historic written records and excavated artefacts all inform our understanding of these events, many of them the major determinants of current conflicts and differences. We trace the history of interactions, the roots of inequalities and the course of differentiation through the archaeological record.

In preparation for the Senior Production Project, students learn to design according to a user-centred methodology and to research and document the needs and aesthetic experience of a specifically targeted group of users.

Course outline: Dynamic Web Design focuses on dynamic and interactive features of Web design – pages which contain responsive and changing elements, or pages which are constructed on the fly. Creative control of the Web requires an understanding of it as a medium in constant flux and requires knowledge of both programming and design. The Web changes constantly, in response to actions of both users and producers, and so do its technologies. By understanding and reflecting on theoretical concepts, the skills acquired in working with HTML, JavaScript, CSS, PHP and Flash will be transferable to future contexts.

Lecture times: 4 lectures per week and compulsory lab sessions during 4th and 5th periods, Monday – Thursday.

DP requirements: Full attendance and submission of all classwork.

It aims to develop interviewing and research skills and the ability to identify a strong story and publication idea. It also stresses some of the constraints and realities of the media market, pushing students to identify likely audiences for their work. The aim is for students to start producing a strong portfolio of work which draws on and exhibits their own particular intellectual and creative skills and talents.

In the second year of study a candidate is required to take two courses, one of which will form the major subject to be carried through into fourth year.

2.2 Core Practice

A candidate must complete FIN2026W Core Practice 2 in the second year. Core Practice 2 is a full studiowork course for promotion and distinction purposes.

2.3 Studiowork 3 Elective

In the third year of study a student is required to take one Studiowork course which will be the major subject carried to the fourth (final) year of study, and two Studiowork 3 Electives which will be the senior subject. The major Studiowork course will take up two-thirds of the available studiowork time and the senior, one-third of the available studiowork time.

Two from the following, subject to availability:

Videography,
Animation and motion graphics,
Curatorship,
Lithography and screenprinting,
Physical computing,
Social responsibility,
Computer-aided design,
Historical photographic processes

FBB3 Examinations:

There is an ordinary University examination at the end of each course. First, second and third year projects will be allocated marks at the mid-year examination. These marks will count 50% towards the final examination mark.

FBB4 Publication or exhibition of work:

A student

- (a) wishing to exhibit in a public or private gallery, enter in a competition, or publish any work must consult the Director of the Michaelis School of Fine Art or his/her nominee before doing so;
- (b) may not exhibit in a public or private gallery, enter in a competition, or publish any work done at the School as part of the work of the course, or under supervision, or that is to be submitted for examination, without the prior written approval of the Director of the School;
- (c) may not without the permission of Senate submit for examination any work that has been exhibited, published or submitted as an entry in a competition without such prior written permission; and
- (d) may not exhibit in a public or private gallery, enter in a competition, or publish any work done at the School as part of the course, or under supervision, or that has been submitted for examination, within a two-year period of obtaining the degree without making due acknowledgements to the University and School.

No publication or exhibition by a candidate may, without prior permission of the University, contain a statement that the published or exhibited material was or is to be submitted in part or full for this degree.

FBB5 Degree specific requirements for selection:

Admission to the programme is limited. Students are admitted on the basis of a portfolio of creative work and NSC results. Details of the selection criteria are published annually. Currently 380 APS points and endorsement for degree studies are required.

FBB6 Degree specific requirements for promotion:

- 6.1 A candidate must complete FIN1001W Studiowork 1 and have permission of the Director of the School before admission to any second-year Studiowork course. A minimum of 55% is required in any FIN1001W studiowork subject area in order for a student to proceed with the second year studiowork course option in that area. A candidate who fails to meet this requirement will require special permission from the Programme Convener and from the Director of the School to proceed in that area.
- 6.2 A candidate must complete FIN1005W Fine Art Foundation and all Studiowork courses of the second year before admission to the third year.
- 6.3 A candidate must complete both Studiowork courses of the third year before admission to the fourth year.
- 6.4 A candidate must achieve a pass mark of 55% for the Studiowork option at the end of the second year in order to be admitted to a majoring course in the third year. A candidate who passes in a prospective major area with less than 55% will be required to submit a supplementary body of work as specified by the School which

will be examined before registration in the following year.

FBB7 Degree specific minimum requirements for readmission:

- 7.1 (a) A candidate must pass FIN1001W Studiowork 1 by the end of the first year;
 (b) A candidate must pass the FIN1006F and FIN1009S courses by the end of the second year.

Failure to fulfil these requirements will mean that the candidate will not be readmitted to the Faculty and the candidate will be required to pass History of Art 1 through the University of South Africa before being considered for readmission to the Faculty. If there are extenuating circumstances, Senate may permit the candidate to renew his/her registration on the condition that he/she, after consultation with the Director of the Michaelis School of Fine Art, registers for either:

- Discourse of Art I at the University; or
- History of Art 1 through the University of South Africa.

Failure to complete the course by the end of the year for which readmission was granted would mean that the candidate would not be permitted to renew his/her registration in the Faculty until such time as evidence has been submitted that he/she has completed Discourse of Art 1 or an equivalent course.

- 7.2 Subject to the provisions of Rule F5, a candidate who fails in Discourse of Art 2 course(s) or a BA subject in two consecutive years will only be considered for readmission once he/she has passed the equivalent failed course(s) through the University of South Africa.

FBB8 Degree specific rules for distinction:

Courses considered for purposes of distinction must have been taken at UCT or at an exchange partner institution. Courses passed for credit from other tertiary institutions are not considered for purposes of distinction.

8.3 *Award of degree with distinction in Discourse of Art*

This shall be awarded to a candidate who obtains first-class passes in FIN2027F and FIN2028S, and FIN3026F and FIN3027S. The degree will be awarded as BA(FA) with distinction in Discourse of Art.

8.4 *Award of degree with distinction in Theory and Practice of Art*

This shall be awarded to a candidate who obtains an average mark of at least 85% in FIN3010H Theory and Practice of Art 3 and FIN4011H Theory and Practice of Art 4. The degree will be awarded as BA(FA) with distinction in Theory and Practice of Art.

A. Language and Literature courses and majors

Students are welcome to register for any language taught by the School, whether or not they have studied the language before. The School offers introductory courses in each of its languages. Furthermore the School welcomes not only those who intend to specialise in any of its languages, but also those who would like to get an introduction to a language and/or are not able to fit more than one or two courses into their degree programmes. A student who, within the preceding five years, has passed a relevant language at Matric level with at least a C symbol, 4 at NSC (or a course recognised as equivalent) will not be admitted to the introductory course of that language for degree purposes, unless the Head of Section is satisfied that for some special reason he/she is not able to perform the work of the second-year first-semester course.

Students can major in any one of the following languages: Afrikaans, Arabic, French, Hebrew, Italian, Spanish and Xhosa (majors in Latin and Greek are subsumed within Classical Studies). A major in a language gives admission to the Honours course in that language and also meets the requirement for anyone wishing to offer a language as a teaching subject after completion of the Postgraduate Certificate in Education course.

B. Cultural Studies

The School offers courses in the fields of cultural, literary, film and historical studies which can comprise a major in Classical Studies and can be taken as electives. Some combinations of these courses qualify the student for admission into Honours courses. These undergraduate courses are taught and examined in English, but where a student wishes to take a course as part of a language major the School will set assignments and examination questions in the relevant language.

PHI1024F INTRODUCTION TO PHILOSOPHY

HEQF credits: 18 at level 5.

(NOTE: This course may also be offered in Summer Term - please consult the Centre for Open Learning.)

First-year, first-semester course, 3 lectures and 1 tutorial per week.

Convener: Dr J Wanderer.

Entrance requirements: As for PHI1010S.

Course outline: This course is an introduction to philosophy that aims to make students more conscious, creative and critical in thinking about their own fundamental beliefs and values. Fundamental issues investigated include: the nature and possibility of knowledge, self-knowledge, the relationship between the mind and the body, the knowledge of other minds, whether we have free will, and whether life has a meaning. These issues are explored with the help of classical and contemporary philosophers, including Plato, Aristotle, Aquinas, Descartes, Hume, Kant, Hegel, Marx, Sartre and others.

Lecture times: 5th period.

DP requirements: As for PHI1010S.

Assessment: Coursework counts 40%; one 3-hour examination in June counts 60%.

PHI1025F CRITICAL THINKING

HEQF credits: 18 at level 5.

First-year, first-semester course, 3 lectures and 1 tutorial per week.

Convener: Dr E Galgut.

Entrance requirements: As for PHI1010S.

Course outline: Why do we value our beliefs? We value them because we take them to be true and, as true, they are good guides. But how can we tell when a belief is true? Our only handle here is whether or not the belief is justified. So we aim to have beliefs that are justified. The course concentrates on the practical business of appraising justifications. Of course, we all routinely attempt to justify our beliefs and arrive at new beliefs on the basis of supposed justifications. But almost as routinely we are hoodwinked. The course aims to make you a better believer by making you more aware of the nature of justification, of the different sorts of justification and the pitfalls of each. At the end of it you will be less gullible and more able to explain just why a particular argument does or doesn't convince you.

Lecture times: 3rd period.

DP requirements: Regular attendance at lectures and tutorials, completion of all tests and submission of all essays and assignments by due date.

Assessment: Coursework counts 50%; one 2-hour examination in June counts 50%.

This course is examined simultaneously with PHI1026F.

PHI1026F CRITICAL FOUNDATIONS

Students in the Extended Degrees of the Faculty are required to take PHI1026F or REL1013H as a core course in their first year of study. The course aims to build skills of critical thought and analysis for application across a range of disciplines in the Faculty and in wider life, and does so within the ordinary undertakings of PHI1025F, with supplementary lectures and with tutorials in the "Philosophy Plus" programme of the Department.

PHI2041S GREAT PHILOSOPHERS

HEQF credits: 24 at level 6.

Second-year, second-semester course, 3 lectures and 1 tutorial per week.

Conveners: Professor B Weiss and Dr G Fried.

Entrance requirements: PHI1024F and at least second year status.

Course outline: This course will introduce you to a selection of philosophy's major figures. The figures chosen may vary from year to year but they will be selected on the basis of their originality, profundity, influence and on the degree to which their works speak to one another. Philosophy often proceeds through an engagement with its past and engaging with one's philosophical inheritance is

one of the most rewarding aspects of studying philosophy. This course will ask you to try to understand a set of historical thinkers and writers not as contemporaries who can be presumed to share our philosophical concerns nor yet as merely historical figures; rather we shall try to appreciate the thinker's writings in the context of his own concerns, which may differ significantly from ours. We shall discover that, when properly understood in this way, these thinkers still have relevance.

Lecture times: 4th period.

DP requirements: As for PHI1010S.

Assessment: Coursework counts 40%; one 3-hour examination in October/November counts 60%.

PHI2042F POLITICAL PHILOSOPHY

HEQF credits: 24 at level 6.

Second-year, first-semester course, 3 lectures and 1 tutorial per week.

Convener: Dr L Bloom.

Entrance requirement: At least second year status.

Course outline: What should our government do for us? Do the rich owe anything to the poor? Should society accept all cultures, or are there limits to tolerance? Is democracy really a good system? What is a just war, and can terrorism be justified? These are some of the questions asked in political philosophy. This course approaches the field in two ways. We choose several great political philosophers from ancient times to the twentieth century, and discuss their aims and arguments. Then we select some areas from contemporary political philosophy, and assess solutions to perpetual or recent problems in these areas.

Lecture times: 2nd period.

DP requirements: As for PHI1010S.

Assessment: Coursework counts 40%; one 3-hour examination in June counts 60%.

PHI2043F/S BUSINESS ETHICS

HEQF credits: 18 at level 6.

Second-year, first- or second-semester course, 3 lectures and 1 tutorial per week.

Co-Conveners: Dr G Fried and J Winfield.

Entrance requirement: At least second year status.

Course outline: Ethical choices are unavoidable in business. This course aims to help you to articulate your options when confronted with an ethical dilemma in business, and to make well-informed judgements about the right thing to do. We will consider a range of problems, from issues that could arise in your first job to questions of business regulation that you may one day face as a leader in commerce or government. In each case, the course will challenge and assist you to recognise ethical problems in practical situations, understand the possible solutions, and make reasoned decisions.

Lecture times: 4th period.

DP requirements: As for PHI1010S.

Assessment: Coursework counts 40%; one 3-hour examination in June or October/November counts 60%.

PHI2044F PHILOSOPHY OF MATHEMATICS

HEQF credits: 24 at level 6.

Second-year, first-semester course, 3 lectures and 1 tutorial per week.

Convener: Dr G Fried.

Entrance requirements: Second year status and at least 50% for Matric mathematics, or a pass for a MAM course, or a lower intermediate score for the NBT in Quantitative Literacy.

Course outline: Mathematics – the paradigm of a successful intellectual practice, with highly secure results and many important applications – raises deep philosophical questions. For instance, if

308 PHILOSOPHY

mathematical objects (like numbers) are not in time or space, then how can we know anything about these objects, and how can mathematics be of any use in understanding the physical world? Some other questions: Does mathematics have a foundation? What is a good mathematical explanation? In what ways does the discipline of mathematics develop? This course discusses and evaluates major contributions, both historical and current, to the philosophy of mathematics. The intended audience includes students who enjoy more abstract areas of philosophy in general as well as those interested in the significance of mathematics in particular.

Lecture times: 1st period.

Assessment: 40% coursework (10% for first essay, 20% for second essay, 10% for weekly quizzes); 60% exam. A DP requires timely completion of all coursework and attendance at 80% of lectures and tutorials.

PHI3023F LOGIC AND THE PHILOSOPHY OF LANGUAGE

HEQF credits: 24 at level 7.

Third year, first-semester course, 3 lectures and 1 tutorial per week.

Convener: Professor B Weiss.

Entrance requirements: PHI2041S and any one of the other second year PHI courses that count toward the major.

Course outline: The philosophical investigation of linguistic meaning came to occupy a pivotal role in philosophy a little over a hundred years ago. The investigation became pivotal because the notion seems deeply perplexing — what sort of relation does a linguistic sign bear to what it represents? how do we form the ability to understand a potential infinity of sentences? — and because, more controversially, it came to seem that we could pursue many other questions in philosophy by looking at how language works. The philosophical focus on language was facilitated by developments in logical theory. The course begins by equipping you with the technical basis in logic and then builds on this to explore the workings of language.

Lecture times: 7th period.

DP requirements: As for PHI1010S.

Assessment: Coursework counts 40%; one 3-hour examination in June counts 60%.

PHI3024S METAPHYSICS AND EPISTEMOLOGY

HEQF credits: 24 at level 7.

Third-year, second-semester course, 3 lectures and 1 tutorial per week.

Convener: TBA. (for enquiries contact the Philosophy office)

Entrance requirements: PHI2041S, and any one of the other second year PHI courses that count toward the major, and PHI3023F.

Course outline: On one widespread conception, metaphysics is a first-order inquiry into “what there is”, whilst epistemology is second-order inquiry reflecting on “what it takes to know what there is.” But the pursuit of epistemology raises metaphysical questions too: what do our ways of knowing tell us about human nature, and the nature of the world? This course explores some core contemporary issues in both areas of inquiry, and considers the relationship between them. Topics in metaphysics may include contemporary investigations into the nature of the mind, its relations to the body and the external world, as well as the nature of causation, space and time. The course may also include some reflection on how, if at all, metaphysical knowledge is possible. Topics in epistemology may include exploring contemporary debates regarding the conception of knowledge, the structure and nature of epistemic justification, the relationship between reasons and beliefs and the value (if any) of scepticism.

Lecture times: 7th period.

DP requirements: As for PHI1010S.

Assessment: Coursework counts 40%; one 3-hour examination in October / November counts 60%.

Course outline: *Yes Minister* was a BBC comedy programme looking at political-administrative relationships in the British government. The main protagonists were Jim Hacker, a well-meaning yet naïve minister and Sir Humphrey Applebey, an experienced and crafty public servant. One of the famous exchanges in the series was in the Episode: *The Right to Know*.

Hacker: 'Humphrey, do you see it as part of your job to help Ministers make fools of themselves?'

Sir Humphrey: 'Well, I never met one that needed any help.'

Public Administration is the clashing of two worlds where politics meets public administration/management. It often means different things to different people. Is Public Administration a study of governmental structures and processes or is it training for a public service vocation? What should be the balance between skills and knowledge in Public Administration education? The only constant theme in Public Administration literature is its concern for organisational questions.

Public Administration is, in its simplest form, the execution of the public laws, regulations, court decisions and public policies that form the core of government activities. This introductory course in Public Administration aims to cover the fundamentals or main themes in public administration, including the evolution of the field, comparative Western and non-Western approaches to the discipline, politics-administration relations, intergovernmental relations, policy making, values and ethics, corruption and accountability. A detailed study of the structure and function of South African government is also undertaken.

The programme is designed to engender in its students the capacity to think objectively and analytically about public policy, public administration and bureaucracies.

Public Policy and Administration has a strong vocational emphasis. An undergraduate degree in Public Administration is often a minimum requirement for entry level into management posts in the public sector. Many of our graduates are currently employed by the public service, local government, parastatals and in policy think-tanks.

This course should also be of interest to students who are interested in how government works as well as those who are interested in broader constitutional and philosophical questions dealing with the relationship between democracy and bureaucracy.

Course outline: This course explores a selection of key sacred texts found in Asian (Buddhism and Hinduism) and Abrahamic religious traditions (Judaism, Christianity and Islam). Students will gain interpretive and exegetical tools through the practical analysis of these texts.

Issues surrounding the authority of texts, their use, their canonisation and proliferation, and how they authorise religious practises will be explored. While there are significant differences between texts as diverse as the *Vedas*, *Pali Canon*, *Torah*, *Bible* and *Qur'an*, there are shared aspects to evaluating texts and their centrality in religious traditions. By studying these diverse texts and shared aspects, the course reflects on the continued reliance of religion on textual traditions and textual practises

Professional registration and conduct

Practice in the field of Social Work is regulated by the South African Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training according to these standards. The University offered a 3-year BSocSc degree in Social Work for students who first registered before 2007. These students were required to complete an appropriate Honours degree offered by the Department of Social Development in order to obtain professional registration with the South African Council for Social Service Professions. From 2007, students registered for a 4-year Bachelor of Social Work (BSW) degree in order to obtain professional registration with the South African Council for Social Service Professions.

Students registered for the professional degrees in social work are required by statute to register from their second year of study with the South African Council for Social Service Professions as a student social worker. As such they are bound by the Council's professional code of conduct. Students who do not adhere to this code of conduct may be required to terminate their registration in the Faculty. Should a student in the course of his/her studies or who qualifies for the award of the degree that allows for professional registration with the said Council be deemed unfit to practise as a social worker following a professional assessment, the Dean will report the outcome of such professional assessment to the Council and inform the student accordingly.

What part can we play in shaping our society? How have sociologists tried to make sense of the society around us in which our everyday experience is located? What is the sociological imagination? How does it help us to go beneath surface appearances to better understand what is happening? The course introduces students to major ways in which sociologists have grappled to make sense of historically dynamic society in an increasingly globalized context.

Lecture times: 4th or 6th period.

DP requirements: Completion of all written tests, essays and assignments.

Assessment: Coursework (incorporating tutorial exercises, assignments and tests) counts 50%; one two-hour examination counts 50% of the final mark.

As a course offered to senior students, Diversity Literacy will prepare students to function effectively in diverse social contexts upon their entry into the work environment. Based on notion of 'Critical Diversity Literacy', the course will provide students with the conceptual tools needed to interpret and respond to the social climate and prevalent structures of power relations. Specifically, this will involve the delivery of "reading practices" so that students can: 1) Recognise the symbolic and material value of hegemonic identities (i.e. whiteness, heterosexuality, masculinity, ablebodiedness, middleclassness etc); 2) Unpack how systems of oppression intersect, interlock, co-construct and constitute each other; 3) Gain understanding of how social identities are the learned outcomes of social practices; 4) Possess a diversity lexicon that facilitates discussion of race, racism, and antiracism, and the parallel concepts employed in the analysis of other forms of oppression; 5) Interpret coded hegemonic practices; 6) Analyse the ways that diversity hierarchies and institutionalised oppressions are mediated by class inequality and inflected in specific social

contexts; and 7) Engage with issues of transformation of these oppressive systems towards deepening democracy/social justice in all levels of social organisation. The course material will enhance the value of all degree programmes in that it will provide students with the conceptual tools needed in order for them to function effectively in any social environment.

Course outline: South Africa post-1994 is an integrated part of the world globalised economy. This course examines socio-economic issues within this international context, with a particular focus on industrial society, exploring change and continuity in terms of theory, policy and the lived experience of everyday life. What is changing? Where is change coming from? Who is driving change? Who benefits from change? What problems stand in the way of development towards a more just society? Against the background of questions such as these, the issues of industrial society to be examined will be drawn from work, industry, inequality, skills development, social welfare and services, governance, education, alienation, health, and others. The course explores these issues in the context of globalisation, using specific illustrative case study material primarily from South African post-1994 industrial society, while drawing illuminating material from other national and transnational situations.

Entrance requirements: See prerequisites under *Requirements for a major*.

Course outline: This course examines contemporary international debates on the social discourses and practices that perpetuate injustice and inequality and their relevance to understanding South African society. The literature may include debates on the way discourses create centres and margins, resulting in social differences which, in turn, have a significant impact on people's life chances. The literature may also include debates on the changing patterns of urban and rural inequality. Who are the winners and losers in today's society? What are the causes of new patterns of social injustice and inequality? In reading a wide literature, students will be provided with comparative concepts with which they can begin to interpret the emerging patterns of social justice and inequality in South Africa.
