Subject: Technician Job at CHOP  
To: Elizabeth Vallen <[evallen1@swarthmore.edu](mailto:evallen1@swarthmore.edu)>

Dear Liz,

It was so lovely to see you this weekend!

I'm attaching a short blurb about the technician position in my lab. It's been a really wonderful opportunity for me, and all of the technicians will be leaving with 2-5 publications each (from projects that we actually had intellectual contributions to!). Gerd (and all the other MD-PhD's in the lab) have also been really supportive during the med school application process -- they've done practice interviews with us, proofread all our applications, and contacted specific programs on our behalf to show their support for us. If anyone is interested, they're welcome to contact me ([jo.thrasher.21@gmail.com](mailto:jo.thrasher.21@gmail.com)) if they have any questions before contacting Gerd.

Let me know if you have any questions or need anything else!

Best,  
Josephine

From Gerd:

We are seeking a motivated technician to join our group, preferably with experience in biochemistry and/or molecular biology.

The position is in the Division of Hematology at The Children's Hospital of Philadelphia. The laboratory of Dr. Gerd Blobel studies epigenetics in the widest sense as it pertains to gene expression and epigenetic memory. We also study molecular and epigenetic mechanisms of hematopoietic development and its disorders and are exploring new treatment strategies for hematological diseases. We are a highly interactive group with several graduate students, postdocs, technicians and a bioinformatician. For more information see <http://www.med.upenn.edu/apps/faculty/index.php/g20000343/p1105>.

Please send an updated CV and the contact information of three references to [blobel@chop.edu](mailto:blobel@chop.edu)
