My lab has two open research technician positions at the Columbia University Irving Medical Center and I’m wondering if you would be able please to circulate the posting to graduating biology seniors in your program at Swarthmore College?

Technicians in my lab have typically come from colleagues in the Northeast and have gone onto PhD or MD/PhD programs including at Columbia, Wash U, Weill Cornell, MIT and Einstein. We publish extensively in the area of malaria and drug resistance and drug discovery research (www.fidock.org). The positions here would start in the summer and be for two years. Students can apply at: https://opportunities.columbia.edu/cw/en-us/job/522497?lApplicationSubSourceID=

Please let me know if this could be sent around or if you could point me to another colleague at Swarthmore who has a suitable listserv.

Thank you! Wishing you both safe and healthy times.

David
