

Join us! The Bennett lab is recruiting an ambitious, undergraduate trained research specialist

- We study microglia, the brain's macrophages. We focus on:
 - Genetic and epigenetic regulation of microglial identity
 - How microglial functions shape the brain in health and disease
 - Microglial transplant technologies to enable novel therapies
- Research specialists in our lab are:
 - Integral to our most important projects
 - Receive excellent training and mentorship
 - Leave prepared for the next step in their scientific career
- We value team members from all backgrounds and paths, and highly encourage folks from traditionally underrepresented groups to apply.

Some details

- 2 year commitment and Bachelor's degree required
- Location: University of Pennsylvania, Philadelphia, PA
- Official job posting is forthcoming
