Dear Swarthmore College undergraduate Biology advisers,

We are writing to let you know about the availability of a technician / laboratory research assistant position for a motivated recent graduate, in the Center for host-pathogen in the departments of Pediatrics, Microbiology & Immunology, and Physiology & Biophysics at Columbia University (Medical Center). Our research focuses on respiratory viral infection and strategies for preventing infection, and during the pandemic has worked to develop SARS-CoV-2 antivirals. Please see the links below and connect us with interested upcoming graduates. Thank you!

Anne Moscona
am939@cumc.columbia.edu

Matteo Porotto
mp3509@cumc.columbia.edu

Center for Host-Pathogen Interaction | Department of Pediatrics

The Center for Host-Pathogen Interaction is a collaboration between the laboratories of Anne Moscona, MD and Matteo Porotto, PhD. Drs. Moscona and Porotto together conduct basic research on paramyxoviruses, RNA viruses transmitted by airborne droplets that are responsible for acute respiratory illnesses prevalent in childhood.
