# Ph.D. in Biology

*Generously fully funded program pursuing innovative and creative research in the biological sciences.*

**The Graduate School of the Stowers Institute** thrives within the dynamic Stowers community, offering collaborative, world-recognized research programs. Developing scientists benefit from state-of-the-art labs, access to scientific leaders, and cutting-edge technologies. The program provides the mentoring and hands-on experience needed to prepare for careers as independent scientists.

## Research Areas:

» Molecular and Cell Biology
» Stem Cell Biology
» Developmental Biology
» Genetics and Genomics

## Program Highlights:

- **Competitive Salary:** $45,320 (2026–27) guaranteed for the program duration; $2,000 post-candidacy increase; professional development allowance
- **State-of-the-art facilities:** Expertly guided access to cutting-edge instrumentation, with dedicated mentorship to master tools needed for project success

## Program Requirements:

- Bachelor's degree
- Strong scientific background in biology-related fields
- Strong undergraduate or postgraduate research experiences
- No application fee, test scores, or TOEFL/ English proficiency tests required

FIRST YEAR

| FALL | SPRING · JAN–JUN | SUMMER ONWARD |
|---|---|---|
| **Modules** | **Rotation Labs** | **Thesis Lab** |
| Taken only the first Fall semester, courses introduce broad topics relevant to Stowers and the wider scientific community | Students rotate through 3 labs to choose their thesis research fit | Full-time thesis research begins without a full course load |
