Hello,

My name is Louise Moncla and I am a new Assistant Professor at the University of Pennsylvania, in the department of Pathobiology. I just started [my lab](#) on September 1, 2022, and I am looking for a research technician to help me set up and contribute to ongoing projects that are focused on understanding viral evolution and transmission. I was wondering whether you might be able to circulate [this posting](#) and to encourage any excellent recent graduates who are looking for research experience to apply. I am happy to teach all the specific skills required for the job, and am looking for someone who is smart, hard-working, and organized. If you know of any great candidates, and/or if you could post this job, that would be fantastic.

Thanks so much, and please let me know if you have any questions or concerns.

Best regards,

Louise H. Moncla  
Assistant Professor  
Department of Pathobiology  
School of Veterinary Medicine  
The University of Pennsylvania
