

From UPenn-

We are in need of lab TAs/Instructors for our Introductory Biology labs. We are trying to find 2 people to cover multiple sections. Each section is 3 hr and a persons could probably do 5-6 sections/ week.

The lab exercises are all written and there are several long-term instructors and a lab coordinator. The folks we hire would work with the students during the labs to lead them through the protocols and grade the lab reports. If you have any recent graduates or anyone qualified who might be interested, can you have them contact me?
