

Wall Street Prep

Used at many university programs globally, Student Passport® on-line courses enables career centers to provide their students with unlimited access to Wall Street Prep's robust online course library.

Target Audience

Students pursuing careers in:

- Asset Management
- Business development
- Consulting
- Corporate finance
- Credit research
- Equity research
- Capital markets
- Investment banking
- Private equity
- Project finance
- Venture capital

Student Passport

Unlimited lifetime access to online Excel, corporate finance, and modeling training

Key Benefits to Liberal Arts Career Centers

- Foundational skills courses in Excel, accounting, corporate finance, and PowerPoint for all students interested in pursuing business and finance careers
- Interactive, on-demand resource for students throughout the recruiting process and on the job
- Designed to replicate the interactive experience of live courses if on-campus seminars are not offered
- Ability to gauge student performance and usage via real-time progress reporting tools

Key Benefits to Students

- Students learn key accounting, finance, and modeling concepts using simple, intuitive, step-by-step instructions that reinforce theoretical intuition while learning the model-building mechanics as performed by finance professionals
- They can watch courses across all desktop and mobile devices and download videos for offline viewing anywhere anytime
- Access to online training content used by investment banks, financial institutions, and Fortune 500 firms to train incoming hires
- Lifetime access makes Passport an essential continuing education and reference tool throughout the recruiting process and on the job

Student Passport Highlights

- **Experienced Instructors:** All of our online courses are led by energetic and engaging instructors, who understand how to effectively teach applied modeling courses to students in an e-learning self-study environment
- **Dynamic, Interactive Courses:** Our focus on blending pedagogical best practices into an online platform enables students to learn intuitively and efficiently, using industry-wide best practices, while video lesson summaries and progress assessments allow them to seamlessly retain and reinforce major concepts
- **Monthly 90-minute Webinars:** These “mini-courses” focus on advanced accounting and modeling as well as industry-specific topics. All live webinars are archived and accessible by students anytime.
- **Unlimited E-mail Support:** Students can connect with our team with any content-related questions as they go through our courses
