

Chemistry and Biochemistry Featured Event!

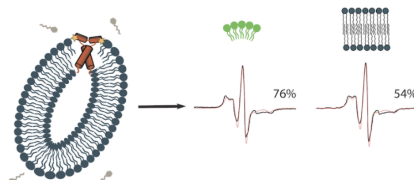

Thursday March 30th 4:30-5:30 PM in SCI 199

Refreshments at 4:15 PM

Join us for short talks presented by senior research students:

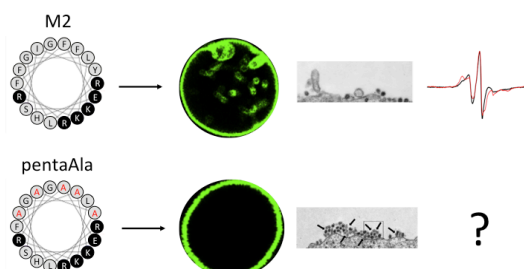

“Spectral Simulation of EPR–Spin–Labelled M2 Protein in Lipids of Differing Curvature Generation Propensity”

by D Stuart Arbuckle '17

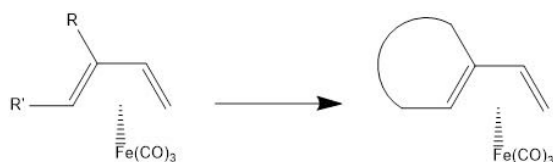

“Conformational Studies of a Domain of the Influenza A M2 Protein Involved in Viral Budding and Morphology”

by Alice Herneisen '17

“Exploring cyclizations of planar chiral η -4 iron(0) tricarbonyl complexes”

by Mason Yu '17

All interested parties are invited and encouraged to attend.
