

Chemistry and Biochemistry Featured Event!

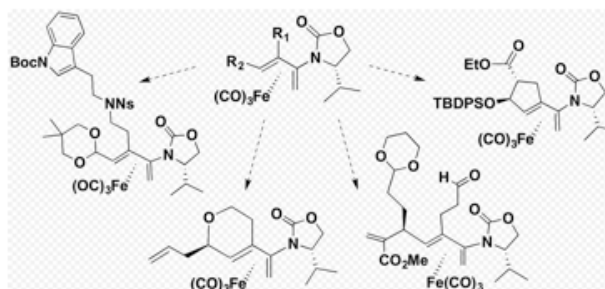

Thursday April 6th 4:30-5:30 PM in SCI 199

Refreshments at 4:15 PM

Join us for short talks presented by senior research students:

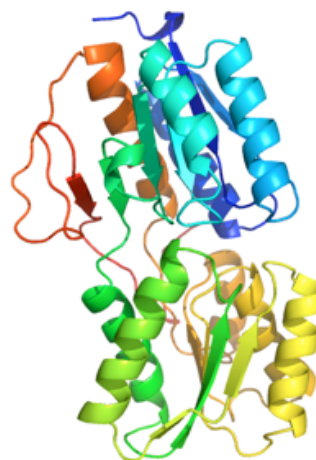

"Diastereoselective Transformations and Intramolecular Cyclizations of Enantiomerically Pure Planar Chiral N-Oxazolidinoyl Diene Iron(0) Tricarbonyl Complexes"

by Sooyun Choi '17

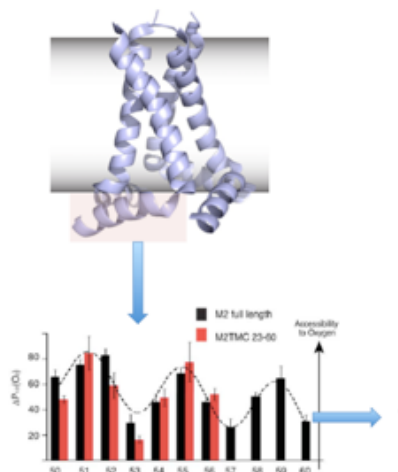

"Investigation of AI-2 Binding to the Quorum Sensing Receptor LsrB"

by Meghann Kasal '17

"Conformation of the Domain of the Influenza M2 Protein that is Critical to Viral Budding"

by Grace Kim '17

All interested parties are invited and encouraged to attend.
