NOTE: In any given recent year, between 20-25% of Swarthmore students express interest in Medical School. The Health Sciences Office works with these students, as well as alumni, in exploring their interest, and providing support throughout the process to those who decide to apply.

*National acceptance statistics are only available for allopathic (M.D.) medical schools while Swarthmore statistics include applicants accepted to allopathic (M.D.) and osteopathic (D.O.) medical schools, although only a few acceptances each year are osteopathic.

**The MCAT test changed for those entering 2016-17; possible scores now range from 472-528. Some old converted Swarthmore scores are included in the Swarthmore mean for the 2016-17 and 2017-18 Entrance Years.
