**NOTES:**

External agencies may compute these numbers using IPEDS data, which, beginning with 2016 enrollments, excludes students studying abroad. The numbers in this table *include* Study Abroad students throughout because Study Abroad students are enrolled, pay tuition, and receive financial aid as well as non-monetary Swarthmore support.

Percentages shown are of all new first-years and all undergraduates, respectively.

While only degree-seeking, domestic students are eligible to receive Pell grants under federal guidelines, all students enrolled in the fall are included in their respective divisor(s) (New First Year and Total).

The finalization of Federal Pell Grant awards occurs over the course of the academic year; therefore this table is occasionally revised. Updates generally result in a slight increase, and so these figures may be regarded as accurate or slightly conservative.

Also, these counts reflect students enrolled in the fall, and so may differ from counts reported elsewhere, which reflect the year.
