_____ **Total Score**

Scoring

Total your score from all 34 questions.

If your score is 90-103, give yourself an **A**. You are using the study skills you need in order to be successful in math.

If your score is 80-89, give yourself a **B**. You are using good math study skills. Choose a few strategies to work on each day, and you will be well on your way to an A.

If your score is 70-79, give yourself a **C**. Your study skills are average. If you want an A, choose one or two strategies in each category to work on until you are using most of the strategies described in the inventory.

If your score is below 70, you are probably having a difficult time in math class. Math may not be your trouble! More than likely, your main problem is the study strategies you are using (or not using). Make yourself do as many of the thirty-four things listed as you can.
