Finding Data

Research Workshop

Finding, evaluating, and accessing data doesn't have to be overwhelming. This workshop will help you confidently locate and assess datasets for your research needs, with extra focus on navigating data repositories and understanding data documentation. Learn practical strategies for discovering relevant data sources, evaluating data quality, and accessing datasets for your projects.

register: https://forms.gle/2BPkmoHmfvf7JQYZ6

WHAT TO EXPECT:

- Identify and locate relevant data sources for your research
- Evaluate the quality and reliability of datasets
- Understand key elements of data documentation and codebooks
- Navigate popular data repositories and databases
- Access and download data for your projects
